FOREWORD

India is one of the nine developing countries of the world which contains about half the world's population and also account for about three fourth of the adult illiterates of the world. Infact India has the distinction of having the largest share viz. 31% of the adult illiterates (15 years and above) of the world. Total number of illiterates of the age group 7 and above in the country at the time of 1991 census including estimates for Jammu & Kashmir was 332.68 million. Of this the seven major states namely Bihar, Madhya Pradesh, Rajasthan, Uttar Pradesh, Andhra Pradesh, West Bengal and Maharashtra having more than 20 million illiterates each account for 65 percent of the population and contain 236 million illiterates forming 71 percent of the total illiterates of the country. It has now been decided to give special attention to these states in the national efforts of eradicating illiteracy by the year 2000. For preparing effective district plans, micro planning has to be done at block and village levels. An effort has been made in this book to present population and literacy data upto C.D. block level in respect of one of the above seven states.

Table 1 of this book gives information on change in literacy situation of the age group 7 and above population during 1981-91 at the state level. Tables 2 and 3 contain districtwise information for 45 districts of the state on total population of all age groups classified by sex, all areas/rural areas and scheduled castes/scheduled tribes. Tables 4 to 7 present districtwise literacy situation of the age group 7 and above population and also give information on number of literates and illiterates as per 1991 census. Table 8 depicts blockwise information for 459 blocks of the state on total, scheduled castes/scheduled tribes population of all age groups and tables 9 and 10 give population, literates, illiterates and literacy rates of the population aged 7 years and above. Table 11 contains the list of Total Literacy Campaign projects sanctioned for Madhya Pradesh till 31.3.94. Annexures I-VI of this book are based on the classification of C.D. blocks by literacy rates for all persons and females, by percentage of scheduled tribes population and contain list of low literacy tribal blocks. Annexure VII gives indices for working out estimates of illiterates by broad age groups and Annexure VIII gives statewise comparative information on illiterates, literates and literacy rates for age group 7 and above for the country based on 1991 census for reference purposes. A brief analysis of the data has also been given.

Planning and preparation of this book has been done by Shri Prem Chand, Fellow in the National Institute of Adult Education. Shri Swarnendu Biswas and Ms. Vinita Gupta, Project Assistants have helped in compilation and processing of the data for this book. I would like to record my deep sense of appreciation for the initiative taken and tremendous efforts put in by Shri Prem Chand. I also appreciate the work done by Shri Biswas, Ms. Vinita Gupta and others in bringing out this book.

This effort is in continuation of our earlier efforts of building up of statistical database for literacy by bringing out two volumes of Statistical Database for Literacy for the country. I hope the data and the brief analysis of literacy situation in Madhya Pradesh at state, district and block levels contained in this book will be found useful for planning and implementation of literacy programmes and will serve the purpose of micro planning at the C.D. block level.

Dated : 8. 4. 1994

SUDEEP BANERJEE
DIRECTOR GENERAL (NLM)

BRIEF ANALYSIS

I. STATE LEVEL

Background

1. The present Madhya Pradesh was formed on Nov.1, 1956 as a result of the reorganisation of states in the country. It consists of four former political units viz. Madhya Bharta, Bhopal, Vindhya Pradesh and Mahakosal (Chhatisgarh). The state now has 11 divisions and 45 districts. It is centrally situated in the country and with an area of 4,43,666 square kilometers, it is the largest state of India. The state is rich in several minerals like iron ore, coal, manganese, limestone, bauxite, mica, diamond. It is also proud of its rich cultural heritage, literary past and the quality teak and sal forests. A major part of Madhya Pradesh is covered with hills and thick vegetation. The Vindhya mountain with its several ranges is spread in the north of Narmada river. The western part of this state is covered with the Aravalli range. The region, south of Narmada has Satpura mountain range. Narmada is the chief river of the region. Other important rivers are Chambal, Betwa, Sone, Mahanadi, etc. Rainfall ranges from 30" to 60" and the soil is black cotton in the Malwa plateau, light and sand mixed in the northern and Vindhya region, fertile mixed in the Narmada Valley and yellow and sandy in the plains of Chhatisgarh.

Demography

2. Total population of Madhya Pradesh according to 1991 census was 66,181,170 comprising of 76.82% rural and 23.18% urban. Decadal growth rate of population in Madhya Pradesh during 1981-91 was 26.84% as compared to the national growth rate of 23.85%. It is not only higher as compared to the national level, but has also not shown the tendency of declining as compared to 1971-81 (25.27%) as has happened in case of many states resulting in decline at national level from 24.66% during 1971-81 to 23.85% during 1981-91. Number of occupied residential houses in Madhya Pradesh was 11,333,438. Number of households was 11,714,945 (8,945,374) in rural areas and 2,769,571 in urban areas). Density of population which was 118 per square kms in 1981 increased to 149 in 1991. Density of population in Madhya Pradesh is low as compared to the national figure of 273. But the number of persons per 100 households which is 555, is higher than the national average of 551. Sex ratio i.e. number of females per 1000 males, which is 931 is slightly better as compared to that of 927 at the national level. Among the 15 major states, decadal growth rate of population during 1981-91 was one of the highest next only to Rajasthan. Annual exponential growth rate worked out to 2.38 as compared to the national average of 2.14. According to SRS estimates of 1991 the highest birth rate of 35.8 was for Madhya Pradesh followed by 35.1 for Uttar Pradesh and 34.3 for Rajasthan as compared to 29.3 for India. In case of estimates for death rate again Madhya Pradesh is at the top with 13.8 followed by 13.5 for Arunachal Pradesh and 12.7 for Orissa as compared to 9.8 for the country. Infant Mortality rate of 122 is only the second highest in case of Madhya Pradesh as compared to the 15 other states for which information is available from Registrar General's office and it is very high as compared to the national average of 80. Madhya Pradesh also has a considerable percentage of Scheduled caste (SC) and Scheduled Tribes (ST) population. According to 1991 census 14.54% of the total population belongs to SC category and 23.27% to the ST category.

3. Table below gives comparative position of 1981 and 1991 population for all areas and for total population, SC population and ST population.

Growth of population during 1981-91

Year	ALL AREAS			RURAL AREAS		
	Persons	Males	Females	Persons	Males	Females
1981						
Total Pop.	52179	26886	25293	41592	21267	20326
SC Pop.	7359	3808	3550	6040	3114	2926
ST Pop.	11987	6003	5984	11553	5773	5780
1991						
Total Pop.	66181	34267	31914	50842	26164	24678
SC Pop.	9627	5028	4599	7522	3920	3602
ST Pop.	15399	7758	7641	14653	7366	7287
Growth Rate of 1981-91						
Total Pop.	26.84	27.45	26.18	22.24	23.03	21.41
SC Pop.	30.82	32.02	29.54	24.54	25.87	23.12
ST Pop.	28.46	29.23	27.69	26.83	27.59	26.08

Educational Facilities

4. Madhya Pradesh is one of the eleven educationally backward states of India. During 1992-93, it had 15 universities, 448 Arts, Science and Commerce colleges, 13 Engineering & Technology colleges, 6 Medical colleges, 20 teacher training colleges, 4,558 High/higher secondary Schools, 15,145 middle schools and 68,949 primary schools. The gross enrolment ratio at the primary stage was 117.7 percent in respect of boys and girls, and it was 87.7 percent in respect of only girls. Gross enrolment ratio at the middle stage was 71.9 percent for both boys and girls and it was only 53.5 percent in respect of girls. The gross enrolment ratios in respect of scheduled caste children except for girls at middle stage were higher than those of children of all communities but in case of children of scheduled tribes the gross enrolment ratios were substantially lower being 76.9% at primary level and 30.2% at the middle level for both boys and girls and 59.4% and 15.1% for girls only. Fifth All India Educational Survey indicated that as on September 30, 1986 only 52.75 percent of the 106,291 habitations had a primary school within the habitation. The survey also indicated that 81 percent of the habitations were served by a primary schools within a distance of 1 km. It means that about 20,000 habitations were not served by a primary schools within a distance of 1 km which is the expected national norm for accessibility of primary schools. Percentage of population served by primary schools within the habitations was 81.51

and upto a distance of 1 km of a primary school, this percentage was 92.92. Thus about 7 percent of the population of the state remained unserved by a primary school upto a distance of 1 km. All efforts are being made to remedy this situation. An ambitious Rs.687 crore scheme for universalisation of primary education with the help of European community under the District Primary Education Programme has been launched in the state. In the first phase 19 districts of the state are covered School mapping and micro planning would be done on a comprehension scale in all blocks of the 19 districts.

Literacy situation of age group 7 and above

5. Literacy rate of the state according to 1991 census is only 44.20 as compared to the national average of 52.21. It ranks 5th from bottom along with the last four states of Bihar (38.48), Rajasthan (38.55), Uttar Pradesh (41.60) and Andhra Pradesh (44.09) in respect of literacy. Female literacy rate was only 28.85 as compared to the national average of 39.29. Literacy rates in rural areas of the state were still lower being 35.87 for all persons and 19.73 for females. In case of scheduled castes the literacy rate of the state for all persons was 35.08 and for females only it was 18.11. For rural areas, the comparative literacy rates for these communities were 30.22 for all persons and 13.30 for females only. In respect of scheduled tribes, the literacy rate of the state for all persons was only 21.54 and merely 10.73 for females. Tribal communities mainly reside in rural areas. Their literacy rates for rural areas in respect of all persons and females only were 20.33 and 9.74 respectively.

6. Table below gives comparative literacy situation for 1981 and 1991 in respect of all communities by sex and rural/urban areas.

(000's)

Year	Population aged 7 years and above			Literates of age group 7 and above		
	Persons	Male	Female	Persons	Male	Female
1981						
All Areas	41763	21618	20145	14295	10467	3828
Rural Areas	33109	16976	16133	8709	6920	1789
Urban Areas	8654	4642	4012	5586	3547	2039
1991						
All Areas	53090	27561	25529	23465	16101	7364
Rural Areas	40433	20843	19590	14503	10638	3865
Urban Areas	12657	6718	5939	8962	5463	3499
Percentage Increase during 1981-91						
All Areas	27.12	27.49	26.73	64.15	53.83	92.37
Rural Areas	22.12	22.78	21.43	66.53	53.73	116.04
Urban Areas	46.26	44.72	48.03	60.44	54.02	71.60

It is observed that the growth rate of population aged 7 years and above during 1981-91 was 27.12 percent and the growth rate of literates of the same age group was 64.15 percent. It shows that the rate of growth of literates was much higher as compared to the growth rate of population of the corresponding age group. But in terms of actual numbers while the population increased by 11327 thousands, number of literates increased by 9170 thousands, leaving 2157 thousand to join the ranks of illiterates during this period. Increase in the number of literates during 1981-91 in case of Madhya Pradesh was 64% as compared to about 50% at the all India level. Despite increasing efforts on the educational front (Enrolment at the primary stage increased from 49 lakhs in 1981 to 80 lakhs in 1991), higher growth rate of population as compared to almost all the states of the country resulted in Madhya Pradesh having to put up with higher problem of illiteracy in 1991 as compared to that of 1981.

7. Impact of the population growth and the educational efforts on the literacy situation during the last three decades will be better understood from the following table which gives comparative position of the growth of literacy and illiteracy in the state from 1961 onwards:-

(000's)

Year	Age Group	Population	Illiterates	Literates	Literacy Rates
1961	5 and over	27077	21532	5545	20.48
1971	5 and over	34971	25748	9223	26.37
1981	5 and over	45108	30564	14544	32.24
1981	7 and over	41763	27468	14295	34.23
1991	7 and over	53090	29625	23465	44.20

From the above table it is observed that the number of illiterates of the age group 5 and over increased substantially during 1961-71 and 1971-81 giving a decadal growth rate of 19.6 during 1961-71 and 18.7 during 1971-81. Number of illiterates of age group 7 and over during the decade 1981-91 increased at the decadal rate of 7.9 percent. 29.62 million illiterates of Madhya Pradesh form 8.90 per cent of the 332.68 millions illiterates of the country and Madhya Pradesh is one of the seven states having more than 20 million illiterates each.

8. Gender disparity in the literacy situation is very high in Madhya Pradesh. While the literacy rate for males was 58.42 in 1991, it was only 28.85 for females. The situation has improved over the years as may be seen from the table below.

Year	Age Group	Literates in thousands		Literacy Rate		Index of G.E.
		Male	Female	Male	Female	
1961	5 and above	4482	1063	32.18	8.09	39.5
1971	5 and above	7016	2207	38.76	13.08	49.6
1981	5 and above	10617	3927	45.51	18.03	56.2
1981	7 and above	10467	3828	48.42	19.00	55.5
1991	7 and above	16101	7364	58.42	28.85	65.3

Number of female literates of age group 5 and over has increased from 1063 thousand in 1961 to 3927 thousands in 1981. Increase in the number of female literates of age group 7 and above during 1981-91 was substantial from 3828 thousand to 7364 thousands. But the literacy percentage is still

very low. Index of gender disparity which was 39.5 in 1961 improved to 65.3 by 1991 but it has still a long way to go till it reaches equity level i.e. becomes 100.

9. Urban rural differential in the literacy rates is also very high. Though the rural literacy rate has improved over the last decades but the gap between the rural and urban literacy has not been affected much as may be seen from the following table.

Year	Age Group	Literacy Rate		Difference in rural-urban Literacy rates
		Urban	Rural	
1961	5 and above	51.37	15.25	36.12
1971	5 and above	58.12	20.09	38.03
1981	5 and above	61.75	24.62	37.13
1981	7 and above	64.55	26.30	38.25
1991	7 and above	70.81	35.87	34.94

Literacy rate in rural areas in 1991 was only half that of urban areas. The differential between the two rates is very high. Though it has gone down from 38.0 in 1971 to 34.9 by 1991, yet the difference between rural and urban literacy rates is persisting at a very high range. Literacy rate for females in rural areas is much lower being only 19.73 percent as compared to 58.92 percent in urban areas. This shows a very dismal position with regard to the literacy differentials of rural\urban areas particularly in case of women where the literacy rate among rural women is only one third that of urban women.

II. DISTRICT LEVEL

10. Of the 45 districts in the state, 14 districts have more than 25 percent tribal population. Five of them namely Jhabua, Dhar, Mandla, Surguja and Bastar which have more than 50% tribal population are included in the category of tribal districts. Disparity in literacy rates at the district level is more acute. Jhabua district which has the lowest literacy rate of 19.01 in the country is at the bottom and Indore with a literacy rate of 66.32 is at the top. The difference in the literacy rates of these two districts itself is more than twice as much as the literacy rate of Jhabua. In case of rural areas the disparity is more acute. It varies from 51.37 in Narshimapur to 13.74 in Jhabua i.e. the literacy rate of the high literacy district is almost 4 times that of the low literacy district. Frequency distribution of the districts by literacy rates in respect of all persons for all areas and rural areas is given below: -

Range of literacy rate (All Persons)	No. of districts falling in the range of literacy			
	All Areas	Percentage	Rural Areas	Percentage
0-10	—	—	—	—
10-20	1	2.2	1	2.2
20-30	2	4.4	10	22.2
30-40	12	26.7	21	46.7
40-50	21	46.7	10	22.2
50-60	7	15.6	3	6.7
60-70	2	4.4	—	—
70-80	—	—	—	—
Total	45	100.0	45	100.0

From the above table it is observed that about 80 percent of the districts were having literacy rate of below 50 percent. Maximum number of districts fall in the two ranges of 30-40 and 40-50. Two out of the five tribal districts fall in the literacy range of below 30 per cent and the other three fall in the range of 30-40. In case of literacy rates for rural areas, the modal range of literacy is 30-40 where 46.7% of the districts of the state are concentrated. Most of the other districts are lying in the ranges of 20-30 & 40-50 literacy rates.

11. Frequency distribution of districts by literacy rates of females for all areas and rural areas indicates a very dismal scene.

Range of Literacy Rate (Females only)	No. of districts falling in the range of literacy			
	All Areas	Percentage	Rural Areas	Percentage
0-10	-	-	3	6.7
10-20	10	22.2	22	48.9
20-30	19	42.3	17	37.8
30-40	10	22.2	3	6.6
40-50	4	8.9	-	-
50-60	2	4.4	-	-
60-70	-	-	-	-
70-80	-	-	-	-
Total	45	100.0	45	100.0

In respect of female literacy, the modal range of literacy is 20-30 in which 42.3% of the districts lie. One fifth of the districts are in the range of 10-20 and another one fifth are in the range of 30-40. Only 2 districts have literacy rate of above 50. The literacy rate among females ranges from 11.52 in Jhabua to 54.17 in Bhopal. Three out of five tribal districts fall in the range of below 20 per cent female literacy and the other two fall in the range of 20-30. In case of female literacy rate for rural areas, about 50% of the districts fall in the literacy range of 10-20. In three districts female literacy rate of rural women is even less than 10 percent and only 3 districts have a literacy rate of more than 30 percent. Female literacy rate in rural areas ranges from as low as 6.83 in Jhabua to 36.27 in Balaghat.

III. BLOCK LEVEL

12. At the time of 1991 census there were 459 community development blocks in the 45 districts of Madhya Pradesh. Frequency distribution of the 459 C.D. Blocks by literacy range is given below:-

Literacy Range (All Persons)	C.D. Blocks falling in the Literacy Range		
	No.	Percentage	Cumulative Percentage
0-5	2	0.4	0.4
5-10	5	1.1	1.5
10-15	19	4.1	5.6
15-20	22	4.8	10.4
20-25	44	9.6	20.0
25-30	60	13.1	33.1
30-35	71	15.5	48.6
35-40	82	17.9	66.5
40-45	76	16.5	83.0
45-50	47	10.2	93.2
50+	31	6.8	100.0
Total	459	100.0	100.0

From the above table it is observed that about 10 percent of the C.D. Blocks had literacy rate of below 20 per cent (Annexure II) and two third of the C.D blocks fell in the category of literacy rates of below 40 percent. Only 6.8 percent of the block had literacy rate of 50 and above.

13. Position in respect of female literacy in the rural areas of the state is still worse. The following frequency table indicating distribution of blocks by female literacy range will support this.

Literacy Range (Females)	C.D. Blocks falling in the Literacy Range		
	No.	Percentage	Cumulative Percentage
5-10	60	13.1	15.3
10-15	101	22.0	37.3
15-20	92	20.0	57.3
20-25	78	17.0	74.3
25-30	67	14.6	88.9
30-35	25	5.5	94.4
35-40	19	4.1	98.5
40-45	7	1.5	100.0
Total	459	100.0	

From the above table it is observed that 10 C.D. blocks have female literacy rate of even less than 5 percent, 70 blocks forming 15.3% of the total are having female literacy rate of less than 10 percent (List at Annexure IV) and more than half of the C.D blocks (57.3%) fall in the category of less than 20 percent female literacy rate. Only about 10 percent of the blocks have female literacy rate of more than 30 percent. This shows that the female literacy position in the rural areas of the state is abysmally low.

14. 140 of the 459 C.D. Blocks (List at Annexure VI) have tribal population of more than 50 per cent and therefore fall in the category of tribal blocks. Literacy situation of these tribal blocks indicates

that 45 blocks are in the literacy range of less than 20 per cent and another 52 are in the literacy range of 20-30 percent. Only 43 blocks have literacy rate of above 30 per cent. In case of female literacy 45 tribal blocks are included in the category of less than 10 per cent female literacy and 68 in the range of 10-20 per cent.

15. Number of illiterates of the age group 7 and above in Madhya Pradesh in 1981 was 27.47 million and of these 9.54 millions forming 34.7 per cent were in the age group of 15-35. By 1991 number of illiterates of the age group 7 and above increased to 29.62 millions. If we apply the 1981 ratio, estimated number of illiterates of the age group 15-35 of 1991 for Madhya Pradesh comes to about 10 million. 31 Total Literacy projects (Table 11) covering 28 districts (21 fully and 7 partly) of the 45 districts of the State were sanctioned till end of March, 1994. Many of these projects are already in operation. Two districts, namely, Narshimapur and Durg have completed literacy campaign and are engaged in post-literacy effort. In other three districts, namely Bilaspur, Raigardh and Raipur areas under phase I are at the post-literacy stage and literacy campaign is on in other parts of these districts under phase II of TLC. Six districts have been provided only ad hoc grant so far.

The total target population to be covered under these TLC projects is more than 5 million comprising of age groups 9-45, 15-35 and 15-45 being covered by different projects. The age group 15-35 is essentially covered by each project. Assuming that about 4 millions illiterates of the age group 15-35 will be covered over a period of time by the projects already sanctioned, another 6 million illiterates of the age group 15-35 still remain outside the scope of literacy campaigns.

16. Total number of illiterates of the age group 7 and above for each C.D. block, district and the State of Madhya Pradesh have been given. Age group data on literacy which is brought out by the Registrar General and Census Commissioner of India in the Social and Cultural Tables has not become available so far. For the purpose of planning of literacy programmes, number of illiterates in age groups of 9-35, 15-35 or 15-45 can be estimated by applying the 1981 census ratios between the total illiterates of the age group 7 and above and the illiterates of the age group being considered as the target population for TLC. For example the illiterates of the age groups 7 and above of 1991 in case of Madhya Pradesh can be distributed in the following ratios based on 1981 census data:-

<u>Age Group</u>		<u>Percent</u>	<u>Estimate No.</u> (in 000's)
7-8	2 years	8.64	2561
9-14	6 years	15.83	4691
15-34	20 years	34.81	10312
35-44	10 years	12.09	3582
45+	All remaining years	28.63	8479
Total- 7 years and above		100.00	29625

District level ratios have been worked out and are given in Annexure VII. These can be used for working out estimates at district level. Since blockwise data for 1981 was not available, district ratio's can be applied for working out estimates at block level for planning purposes. These will need to be verified through actual survey of illiterates as part of Total Literacy Campaign.

Annexure VIII presents a comparative picture of literacy for the age group of 7 and above for 1991 for all states and union territories of India except for Jammu & Kashmir where 1991 census was not held. This has been added for use as a reference when we compare number of illiterates, literates or literacy rates of Madhya Pradesh with other states of the country or even at the national level.
