PREFACE

This is the 'Third' issue of the Statistical Abstract of the New State of Madhya Pradesh. This volume incorporates the available statistical data relating to the various heads of economic and social aspects of the economy of the State. The statistical data presented have been culled from various statistical published and unpublished reports and records of the various departments of the Central and State Governments and other organisations and presented under appropriate heads. The economic statistical series thus presented give an idea of the developing socio-economic situation in the State, and the progress achieved in the various fields and sectors such as Agriculture, Forestry, Industry, Mining, Irrigation and Power, Trade and Transport, Education, Public Health, Co-operation, Banking, Labour and Employment, State Finance, Planning and Community Development Programme, etc. Inclusion of the provisional results of the Census 1961 is yet another special feature of this issue. Brief explanatory notes explaining the scope and coverage of the data, agencies engaged in the collection and compilation, period to which such statistical series relate, the definition of certain economic and statistical concepts used, and the limitations of statistical data on various sections of the Abstract are given in the beginning. An attempt has been made to present the statistical series simultaneously in 'Metric Units'. The conversion ratios are given in general notes.

In the preparation of this Abstract, co-operation and assistance extended by the various departments of the Central and State Governments, and other organisations which have kindly, and often at considerable trouble, supplied information, are gratefully acknowledged. Thanks are also due to the State Government Press for bringing out this publication in the best form and within shortest period.

The work of compilation of the Abstract was done in the Co-ordination (Statistics) Division of the Directorate of Economics and Statistics, Madhya Pradesh.

STATISTICAL ABSTRACT OF MADHYA PRADESH

1961-62

EXPLANATORY NOTES

Section I—Madhya Pradesh at a Glance

Selected economic indicators relating to important aspects of State economy are given under this Section. The statistical information is based on the data included in other sections, supplemented by the latest figures made available till the time of its going to the press.

Section II—Administrative Set-up

The information on area, population and number of towns and villages as per 1961 Census in respect of the different integrating regions of the former States, which coalesced on 1st November, 1956, to form the present State of Madhya Pradesh, has been presented in table 2.1. Table 2.2 gives district-wise units of revenue administration and distribution of towns, villages and police stations.

Table 2.3 presents administrative units of some State Government Departments along with their coverage of the revenue districts.

Section III—Climate

The Regional Meteorological Centre, Government of India, Nagpur, is responsible for the recording and compilation of daily meteorological data at 36 observatories located in the State. In addition to this, rainfall statistics are also recorded at 214 rain-gauge stations by the Land Records Department, 50 rain-gauge stations by Public Works Department (Irrigation) and at 20 hydro-meteorological stations.

Table 3.1 gives the geographical situation—latitude, longitude and height above mean sea level of various observatories working in the State. The information presented in table 3.2 relates to monthly rainfall and number of rainy days recorded at meteorological stations during the years 1955 to 1961. Table 3.3 presents season-wise distribution of monthly normal and current (1959-60) rainfall in each district of the State.

Tables 3.4 and 3.5, however, give monthly average figures on mean-maximum and mean-minimum temperatures recorded at various observatories during 1955 to 1961.

Rainfall.—Actual precipitation is recorded daily at 8.30 hours (I. S. T.) at all stations, which measures the rainfall of previous 24 hours. A day with a precipitation of 0.1 inch (or 2.5 mm.) or more, is considered a rainy day by the Indian Meteorological Department.

Temperature.—The readings are taken twice a day at 8.30 and 17.30 hours.

The rainfall and climate statistics are published in greater detail in —

- (i) 'Daily Rainfall of India;
- (ii) 'Monthly Rainfall of India;
- (iii) 'Monthly Weather Report; and
- (iv) 'India Weather Review—Annual Summary' brought out by the Central Meteorological Department, Government of India, and in the—
 - (a) 'Tables of daily rainfall recorded at stations in Madhya Pradesh',
 - (b) 'Monthly and Annual Rainfall Tables of Madhya Pradesh', issued by the Land Records Department Madhya Pradesh.

Section IV—Area and Population

This section presents districtwise area figures corrected up to 31st March, 1962, by the Surveyor General of India, and population figures on the basis of the final results of 1961 Census. The information is based on 'Census Paper No. 1, 1962,' and various volumes on the Census 1951, issued by the Registrar General and Census Commissioner, Ministry of Home Affairs, Government of India and the Superintendent of Census Operations, Madhya Pradesh.

Table 4.1 gives districtwise information on area, population, density of population and land *per capita*. The districtwise area figures given here and as ascertained by the Surveyor General, Government of India, and those given as per village papers of State Land Records Department in the same table or in tables 4.5, 24.1 and 24.2, are not identical because of certain differences in concepts and area covered.

Distribution of population in rural and urban areas as well as by sex and variation of population (State and Cities) during last seven decades, and variation in population of districts during 1941-61, are incorporated in tables 4.2 to 4.6. The distribution of various towns according to population groups and their population figures according to 1961 Census, are given in tables 4.7 and 4.8 respectively.

Table 4.9, however, gives provisional figures on distribution of occupied houses, households and household population in each district.

The projected population estimates for the State by sex and age-groups worked out by the Central Statistical Organisation, Government of India, are given in table 4.10.

Section V—Vital Statistics and Public Health

Available statistics relating to births, still-births, deaths, infant deaths and deaths by causes, and respective rates of their occurrence in the State, selected towns having a population of 30,000 and above, and medical districts are given in tables 5.1 to 5.4. These statistics refer only to areas where these events are registered.

Tables 5.5 to 5.12 give information relating to the distribution of medical institutions with the number of beds provided therein, family planning clinics, progress of medical education, and training of nursing and paramedical personnel. The achievements of various health programmes on control of communicable diseases are given in the adjoining tables 5.13 to 5.19. The working of Surgical Department of Gandhi Medical College, Bhopal and Hamidia Hospital, Bhopal for the years 1960 and 1961, are given in next three tables 5.20 to 5.22.

Section VI—Education

Most of the educational statistics have been supplied by the Director of Public Instruction, Madhya Pradesh, and the Education Department, Government of Madhya Pradesh. These data have been culled from the annual education statistics compiled by the State for transmission to the Government of India, Ministry of Education.

The data given in tables 6.1 to 6.11 relate to the number and type of recognised and unrecognised educational institutions—'For Males' and 'For Females'. Distribution of scholars in these institutions, expenditure on education classified by sources of revenue, number of trained and untrained teachers classified by sex, university and collegiate education, social education, adult education, etc., are also presented in these tables.

Recognised institutions are those in which the course of study prescribed or recognised by the Director of Public Instruction or by a University or by a Board of Secondary and Intermediate Education, constituted by law, is followed and which satisfies one or more of these authorities, as the case may be, in the sense that they attain a reasonable standard of efficiency. They are open to inspection and their pupils are ordinarily eligible for admission to public examinations and tests held by the Directorate or the University or the Board.

Unrecognised institutions are those which do not come under the purview of the above definition of recognised institutions.

Tables 6.12 and 6.13 give sexwise distribution of literate population and percentage literacy for each district of the State based on the 1961 Census results declared by the Superintendent of Census Operations, Madhya Pradesh. In the next table 6.14, however, has been presented a list of institutions existing during 1961 for higher education, professional education and technical education. More detailed information is available in the 'Annual Report on Progress of Education' issued by the Education Department of the State, and other publications on educational statistics issued by the Government of India, Ministry of Education.

Section VII—Printing Presses and Publications

This section presents districtwise data regarding number of printing presses working in the State during the years 1957 to 1960. Books published and classified by language and distribution of news papers and periodicals published and classified by language and periodicity, are also given under tables 7.2 to 7.5. These statistics are collected under the Indian Press Act, 1867, as amended in 1956 by the Directorate of Information and Publicity, Madhya Pradesh.

Section VIII—Judicial Administration

The judicial statistics divided into two parts—Civil and Criminal, are collected annually in sufficient details from the District and Session Judges and District Magistrates by the High Court of Judicature at Jabalpur, and are published in the annual reports on the Administration of Civil and Criminal Justice in Madhya Pradesh.

Under Civil Judiciary, data relating to the number and description of civil suits instituted, value of civil suits instituted and results of trial of civil cases both in the courts of original jurisdiction and appellate courts, are given under tables 8.2 to 8.7 and 8.12. Information regarding Criminal Courts on results of trials of criminal cases, appeal and revisions, offences reported and persons tried and punishments inflicted, is given in tables 8.8 to 8.11.

Table 8.13 gives the number of registered pleaders and advocates in each district during the year, 1961.

Section IX—Registration

Table 9.1 shows the districtwise distribution of registered documents alongwith their description and value of property transferred, classified as movable and immovable, for the year 1958-59. Such information is collected and compiled by the Inspector General of Registration, Madhya Pradesh, and is published annually in the "Working of Registration Department."

Section X—Police and Crime

The section presents statistical information regarding Police Administration in the State. Table 10.1 shows the distribution of police stations and out-posts in each district during the year, 1962. Strength of police personnel and cost of civil police are given in the table 10.2. Although water-constable force referred to here is not maintained in the State, the term has been retained in conformity with the All-India *pro forma* prescribed by the Intelligence Bureau, Ministry of Home Affairs, Government of India.

Tables 10.3 to 10.8 refer to cognizable and non-cognizable crimes classified by the nature of offence and persons involved therein during 1958 to 1960. Cases or offences committed by Juveniles, incidence of various types of crimes reported under I. P. C. and value of property stolen and recovered under cognizable offences have been shown in tables 10.9 to 10.11. Details of general management of police-equipment and discipline, results of crime investigations—cases tried and persons affected, incidence of railway crime; decoities committed and houses constructed for police personnel are given in the remaining tables.

Table 10.16 deals with the offences committed under untouchability (Offences) Act, 1955.

More detailed information is annually published in the 'Annual Administration Report' issued by the Inspector General of Police, Madhya Pradesh.

Section XI—Prisons

Statistics relating to prisons and prisoners are collected from Central Jails, district jails, sub-ordinate jails and lockups by the Inspector General of Prisons, Madhya Pradesh and published every year in the 'Annual Administration Report'. Distribution of prisoners received, discharged alongwith average daily attendance in prisons is given in table 11.1. Remaining tables give information on age and state of education of convicts, disposal of convicts, nature and length of sentences of convicts admitted, sickness and mortality among prisoners, habitual offenders admitted, expenditure incurred in guarding and maintaining prisoners and working of the marks system in various jails.

Section XII—State Finance

The financial transactions of the State Government for the financial years, 1957-58 to 1961-62 are presented in various tables under this head. Details about capital expenditure outside revenue account, *i. e.*, expenditure met usually from borrowed funds including capital expenditure incurred by the State Government on items like irrigation, civil works, industrial developments, electricity development schemes, etc., are given in table 12.4. Estimates of revenue and expenditure of the State Government for each year from 1959-60 to 1965-66 are given in the last two tables 12.11 and 12.12.

The financial statistics published in the administration reports of the various departments may not agree with the actuals shown in the Budget Estimates. This is due to two reasons, firstly, the actuals shown in the Budget Estimates are arrived at after making adjustments between State Government and the Central Government accounts, but the departmental figures take no account of such adjustments and secondly, the revenue and expenditure statements of some departments relate to the calendar year and not the financial year.

The following annual publications issued by the Finance Department, Madhya Pradesh, give budget estimates:—

- (i) 'Budget Estimates of the Government of Madhya Pradesh.
- (ii) 'Development Estimates of the Government of Madhya Pradesh'.
- (iii) 'Public Works Department (Buildings and Roads and Irrigation Works), Budget Estimates of Madhya Pradesh.'
- (iv) 'Memorandum on the Budget'.

Annual 'Budget-in-Brief' issued by the Directorate of Economics and Statistics, Madhya Pradesh, also gives such data.

Section XIII—Small Savings Schemes

Account of the progress of various Small Savings Schemes launched in the State during 1956-57 to 1960-61 is given in table 13.1. Monthly statistics are collected and compiled by the National Savings Commissioner, Government of India, Nagpur.

Section XIV—Income Tax

The Income-Tax statistics are collected and compiled every year under the Income-Tax Act, 1922 by the Central Board of Revenue, Government of India. The figures refer to regular assessments completed during the year by the Income Tax Department and do not include demands raised for advance payment, provisional assessments or miscellaneous demands like penalties, warrant fees, etc. Figures of taxes represent the demand raised and not the collections actually made against those demands.

Trade classification of business and professional income assessed to income-tax and super-tax is given in the table 14.1. The next table 14.2 presents an analysis of the gross

and net demand of income-tax and super-tax according to the class of income assessed, number of assessees in each category, and total income assessed during 1957-58 to 1960-61.

The subsequent tables 14.3 to 14.10 analyse the demand for Income-tax and Super-tax according to the class of assessees *viz.*, individuals, Hindu undivided families, unregistered firms and other associations of persons, registered firms and companies and other concerns assessable at company rates, and incorporate data on total tax demand (including surcharge) payable by assessees and net income left in their hands after payment of tax. The number of assessees shown are in respect of each assessment made on them and an assessee having more than one assessment made on him during the year is counted more than once. The figures of tax shown against the 'unclassified demand' and 'unclassified refund' items refer to the increase or decrease in tax arising out of reassessments of cases on account of appeal, revision, rectification, etc, which are not analysed in details.

Analysis of the tax demand payable on income earned by assessees from (i) 'Dividends', (ii) 'Interest on Securities' and (iii) 'Property' has been made in tables 14.11 to 14.13. The figures shown against the head 'Unclassified' under each source, represent the incomes earned from these sources by assessees who are either pure refundees on account of their total income being below the taxable limits or assessees who are totally exempt from levy of tax under the provision of the Income-Tax Act or assessees whose total income results in loss or unabsorbed depreciation and hence are not liable for levy of tax.

The last table gives the classification of assessees according to ranges of net income for the years 1957-58 and 1958-59.

Section XV—Local Finance and Local Bodies

This section deals with the finances of municipal corporations, municipal committees and village panchayats, classified according to the sources of revenue and heads of expenditure.

Tables 15.1 to 15.6 relate to the finances of three corporations *viz.* Jabalpur, Indore and Gwalior for the years 1956-57 to 1960-61, whereas the next table gives the income and expenditure of some municipal committees for the years 1956-57 to 1958-59.

The distribution of various types of urban and rural local bodies in each district is given in tables 15.8 to 15.9. The last three tables contain districtwise data relating to total population covered by panchayats, number of members, both elected and nominated, total income and expenditure, etc., for the year 1957-58.

The finances of the corporations are annually published in greater detail, in their respective Budget Estimates for the year ending 31st March.

Section XVI—Excise

Detailed figures of State revenues from excise duties on liquor, opium, *ganja* and *hang*, and licence and permit fees, etc., for the financial years 1959-60 and 1960-61, are given in table 16.1. Subsequent four tables give the estimates of consumption of liquor, *ganja*, *bhang* and opium for the years 1957-58 to 1961-62. These figures are given separately for the 35-Excise Administration Districts.

The last table 16.6 gives the rates of excise duties levied on liquor, *ganja* and *bhang* during 1959-60 to 1961-62.

The Annual Report on Excise Administration of Madhya Pradesh for the year ending 31st March, gives detailed information on the above items and other ancillary information, *i. e.*, number of licensed shops, number of permits issued, number of offences, convictions and fines imposed, etc.

Section XVII—Sales Tax

Figures on revenue receipts under the general State Sales Tax Act and Central Sales Tax Act, from the tax levied on the sale of motor spirits, and miscellaneous fines and fees realised, are given in tables 17.1 to 17.4.

The commoditywise revenue receipts and taxable turn-over of commodities covered under the C. P. and Berar Sales Tax Act, and Madhya Bharat Sales Tax Act, for the period 1st April 1959 to 30th October 1959, are given in tables 17.5 to 17.6. The Schedule of Sales Tax rates levied in the State during 1960-61 is also given in this section. The Annual Administration Reports of the Sales Tax Department give more detailed information.

Section XVIII—Entertainment Tax.

Revenue receipts from Entertainment Tax levied in the State are given separately for each district for the years 1957-58 to 1961-62 in table 18.1. Such Statistics are collected and published by the Excise Commissioner, Madhya Pradesh.

Section XIX—Land Revenue

In table 19.1 under this head is given data relating to the area held in raiyatwari and malguzari villages, area under government forests, revenue assessed and collected on total assessed area and cultivated area, incidence of land revenue per head of population and per acre of total area and cultivated area, for the four constituent regions of the State *viz.*, Mahakoshal, Madhya Bharat, Vindhya Pradesh and Bhopal, for the assessment years 1951-52 to 1956-57. Such details for the whole State also for the years 1957-58 to 1959-60 are given in table 19.1. The next table presents similar data for each district for the year 1959-60.

Table 19.3 incorporates tahsilwise data on land revenue demand and collections for the years 1957-58 to 1960-61.

These statistics are collected by the Land Records Department, Madhya Pradesh and are published annually in the 'Tables of Agricultural Statistics'.

Section XX—Prices Current

Statistics of average wholesale and retail prices for selected agricultural and non-agricultural commodities ruling at Indore City during 1951 to 1961 are given in tables 20.1 and 20.2. These prices are based on the fortnightly prices collected by the Directorate of Economics and Statistics, Madhya Pradesh.

The average wholesale farm (harvest) prices of rice, jowar, wheat, gram, sesamum (*til*) and linseed crops are given for 1950-51 to 1960-61 in tables 20.3 to 20.8. These prices are based on the various sources of publications mentioned in the Appendix 20.2 (A). The Directorate of Land Records, Madhya Pradesh, is responsible for the collection and compilation of these prices. Weekly wholesale farm prices for each crop from representative village markets in each district are collected during harvesting season of the crop and published every year in the 'Farm (Harvest) prices of agricultural commodities in Madhya Pradesh'.

Table 20.9 gives the index of wholesale farm prices with base 1952-53=100 for the years 1953-54 to 1960-61. The index includes 22 crops divided into two major groups—food-grains and non-foodgrains, and four sub-groups—cereals, pulses, oilseeds and miscellaneous crops. The index numbers are based on chain-base weighted arithmetic average method, weights being assigned to the different commodities in proportion to the total value of their production in the base year and the production itself being evaluated at the State average farm price.

Working Class Consumer Price Index Numbers for the five industrial towns of Madhya Pradesh, *viz.*, Jabalpur, Bhopal Satna, Gwalior and Indore and comparative average indices for All India are contained in the next table 20.10. These index numbers represent the changes in the cost of a given basket of goods and services consumed by an average working class household in each centre as determined by periodical field enquiries. The items for which regular prices are collected, have been grouped under five major heads—food, fuel and lighting; clothing, bedding and footwear; house-rent and miscellaneous. The index for any group is the weighted arithmetic average of the price relatives on several items in a group the weights being proportionate to the expenditure of an average working class family on the item during the base year.

The general index is worked out from group indices by weighted arithmetic average method, weights being the percentages of total expenditure denoted to each of these groups. Annual indices are the arithmetic means of monthly indices. The index numbers for Indore and Gwalior centres are compiled by the Directorate of Economics and Statistics, Madhya Pradesh, while the Labour Bureau, Government of India, Simla, is responsible for constructing these indices for the remaining centres.

The last Table 20.11 contains the consumer price index numbers (interim series) for agricultural labour in Madhya Pradesh, with base 1950-51=100, for the years 1957 to 1961. These indices are based on the periodical wage data collected and compiled by the Labour Bureau, Government of India, Simla.

Section XXI—Banks and Financial Corporation

This section presents the progress of Banking and working of State Financial Corporation in Madhya Pradesh. Table 21.1 shows the distribution of banking offices by population (Census 1951) located in the State during 1958 to 1960. These statistics relate to the banking offices including temporary or seasonal offices, of commercial scheduled and non-scheduled, banks, co-operative banks and offices of foreign banks. Offices of banks which have not submitted the requisite statistics as well as those in liquidation or refused licences under Section 22 of the Banking Companies Act, 1949, are excluded.

The next table 21.2 gives the number of Indian Joint-stock Banks having registered office in the State, their paid-up capital and reserves, and the number of offices including head office, located within or outside the State. The Joint Stock Banks have been classified as 'scheduled banks' and 'non-scheduled banks'. The scheduled banks (Class A-1) are those banks which have paid-up capital and reserves of an aggregate, real or exchangeable value of not less than Rs. 5 lakhs and are included in the Second Schedule to the Reserve Bank of India Act, 1934. The non-scheduled banks are not included in the Second Schedule and are divided, according to paid-up capital and reserves, into the following four classes:—

A-2—Banks having paid-up capital and reserves of Rs. 5 lakhs and above.

B —Banks having paid-up capital and reserves between Rs. 1 lakh and Rs. 5 lakhs.

C —Banks having paid-up capital and reserves between Rs. 50,000 and Rs. 1 lakh.

D —Banks having paid-up capital and reserves of less than Rs. 50,000.

Details of liabilities and assets, *vi z.*, paid-up capital reserves, deposits, loans and advances of the Joint Stock Banks in the State are shown in Table No. 21.3.

Table No. 21.4 shows operations of Central Co-operative Banks, their liabilities and assets, working capital and paid-up capital, reserves, deposits and investments, etc. for the years 1958 and 1959. Information about loans from Reserve Bank of India and State Co-operative Bank is also given in this table.

The annual publications of the Reserve Bank of India 'Statistical Tables relating to Banks in India' and 'Co-operative Movement in India' contain detailed information regarding Joint Stock Banks and Co-operative Banks.

Table No. 21.5 shows secured advances of scheduled banks against Principal types of securities. The securities are grouped into five major groups and thirty three sub-groups. More detailed information regarding secured advances is published in the monthly 'Reserve Bank of India Bulletin'.

The next four tables *vi z.* 21.6 to 21.9, relate to the Madhya Pradesh Financial Corporation and present the capital structure, loan operations (loans sanctioned, disbursed and out-standing) for the years 1958-59 to 1960-61. More details are published in the Annual Report and Accounts of Madhya Pradesh Financial Corporation.

Section XXII—Joint Stock Companies

Information relating to the number of Joint Stock Companies (public and private) at work, their capital structure, new companies registered, companies liquidated, and net change in the capital structure of companies is given here. The Registrar of Joint Stock Companies, Government of India, Gwalior is responsible for the collection of monthly returns on the working of Joint Stock Companies in the State under the Indian Companies Act, 1913, as amended in 1956. These statistics are published monthly by the Department of Company Law Administration, Government of India, in their 'Blue Book' on the 'Working of Joint Stock Companies'.

Section XXIII—Co-operation

This section presents the progress of co-operative movement in Madhya Pradesh. Tables 23.1 to 23.5 show the working of State (Provincial) Co-operative Bank, Central Banks (Central credit societies), agricultural and non-agricultural credit societies, agricultural non-credit societies. Details regarding membership, paid-up capital, reserves, loans outstanding and working capital, etc., of Primary Land Mortgage Banks, grain banks, farming societies, irrigation societies, weavers' societies, primary consumers' co-operative stores, primary marketing societies and housing societies are given in tables 23.6 to 23.10 and 23.12 to 23.14.

Information relating to societies under liquidation during 1957-58 to 1959-60 is given in table 23.11.

The last table shows the distribution of various types of co-operative banks and societies in the State for the years 1957-58 to 1959-60 alongwith districtwise distribution for the year 1960-61.

Detailed statistics on the subject are contained in the annual publications *viz.*, 'Statistical Tables relating to Co-operative Movement in India', issued by the Reserve Bank of India, and 'Report on the Working of Co-operative Societies in Madhya Pradesh' issued by the Registrar, Co-operative Societies, Madhya Pradesh.

Section XXIV—Agriculture

Available agricultural statistics for the period 1950-51 to 1960-61, for the new State of Madhya Pradesh are presented in this section. The statistics for the years 1950-51 to 1954-55 have not been adjusted for the transfer of Sunel enclave from Mandasaur district to Rajasthan, and, merger of Sironj sub-division of Rajasthan in Vidisha district of M. P. State. The final estimates given in the 'Statistical Abstract of Madhya Pradesh, 1958-59' have been replaced by actuals in the present issue. The agricultural year in the State commences from the 1st July and ends on the last day of June of the year.

In the absence of separate data for the newly formed districts of Narsimhapur, Seoni and Damoh, figures for these districts for some years have been included in their former districts of Hoshangabad, Chhindwara, and Sagar respectively. The figures for Jabalpur and Bhopal Divisions are, therefore, unadjusted on account of such changes. The attention of the reader has also been drawn to this limitation by putting the mark @ in relevant statistical tables.

Tables 24.1, 24.17, 24.44 and 24.63 give summary figures for the State relating to (i) area and classification of area, (ii) area sown under principal crops, (iii) outturn of principal crops, and (iv) average yield per acre of principal crops, for the years 1950-51 to 1960-61. These statistical series have also been presented in metric units. The remaining tables up to 24.60 present districtwise information on the above subjects for the period 1951-52 to 1960-61. Tables 24.61 and 24.62 give the area sown under cotton and production of cotton according to the trade classifications.

The land utilization statistics, according to the revised classifications and definitions, as laid down by the Ministry of Food and Agriculture, Government of India, were available for Madhya Bharat, Vindhya Pradesh, and Bhopal regions only from 1950-51, and for Mahakoshal

region from 1953-54. The tables on area and classification of area are based on the following concepts:—

- (a) *Area according to village papers.*—This is based on annual returns of area prepared by the village staff of the Revenue Department for revenue purposes. This differs from the area according to Surveyor General, Government of India, because of the different methods used for estimation and the existence of un-surveyed or non-reporting areas.
- (b) *Area under forests.*—Figures given here are not identical with those given in Section XXVII on forests owing to different concepts of forests adopted by Forest Department and Directorate of Land Records. The report on the administration of Forest Department relates exclusively to forests worked by Forest Department while the tables of Agricultural Statistics include, in addition, forest areas administered by district officers. Certain villages and other lands not covered by forests but worked by the Forest Department are not treated as forests in the returns of 'Agricultural Statistics'.
- (c) *Area not available for cultivation.*—This includes—(i) land put to non-agricultural uses, *i. e.*, lands occupied by buildings, roads and railways or under water, *e. g.*, rivers and canals, and other lands put to uses other than agriculture, and (ii) barren and unculturable land like mountains, deserts, and lands which cannot be brought under cultivation unless at a high cost whether such land is in isolated blocks or within cultivated holdings.
- (d) *Other uncultivated and excluding fallow lands.*—This term includes—(i) permanent pastures and other grazing lands, (ii) areas under miscellaneous tree crops and groves not included in the net area sown, and (iii) culturable waste, *i. e.*, lands available for cultivation but not taken up for cultivation or abandoned after a few years for one reason or the other, or lands once cultivated but not cultivated for five years in succession.
- (e) *Fallow lands.*—These include culturable areas which, after abandonment, remain uncultivated either over a period of 2 to 5 years called 'Old Fallows', or are kept fallow during the current year (including any seedling areas which are not again cropped in the same year) called 'Current Fallows'.
- (f) *Net and gross area sown, and total cropped area.*—The term 'net area sown' includes areas sown with crops and orchards area sown more than once being counted only once. However, while calculating the total gross area sown or total cropped area, if different crops are raised in a year on a given land, the same area is counted more than once.

Table 24.64 gives districtwise average standard and current yield per acre in lbs. of principal crops for the year 1960-61. These figures are based on the exact acreage and production data of crops for the individual district, except in case of rice and wheat crops where an allowance (+) of 5 per cent is taken in their production figures on account of bund areas.

The index numbers of agricultural production in Madhya Pradesh on base 1952-53=100, are given in Table 24.65 for the period 1953-54 to 1960-61. These index numbers cover 24 principal crops (other minor millets and other minor pulses being counted as single commodities) which account for 90.3 per cent of the total cropped area in the State during 1952-53. The crops are divided into two main groups—'food grains' and 'non-food grains', and six sub-groups. The index numbers have been constructed by the chain-base weighted arithmetic average method, the weights being assigned to different crops in proportion to the total value of production of each crop during base period and the production itself being evaluated at the State average farm price.

The last two tables 24.66 and 24.67 give districtwise distribution of land holdings according to size and areas covered under these land holdings based on the Census of Land Holdings, 1954-55, conducted in the former States of Madhya Pradesh, Madhya Bharat, Vindhya Pradesh and Bhopal. The data are based on the annual village papers of the agricultural year 1952-53 in former Madhya Pradesh, Vindhya Pradesh and Bhopal States, and of 1953-54 in Madhya Bharat State. In Vindhya Pradesh State, the holdings below 10 acres were excluded from the Census but in the tables under reference, such holdings have been taken into account.

The sources of these agricultural statistics are the various published and unpublished records of the Directorate of Land Records, Madhya Pradesh. More exhaustive and comprehensive details are given in the following publications issued by the Directorate of Land Records, Madhya Pradesh:—

- (i) Tables of Agricultural Statistics of Madhya Pradesh—Annual.
- (ii) Season and Crop Report—Annual.
- (iii) Estimates of Area and Yield of Principal Crops—Annual.
- (iv) Crop Forecasts—Periodical.

Section XXV—Irrigation

This section deals with the irrigation statistics relating to number of wells used for irrigation and domestic purposes, abandoned wells, irrigation tanks, for the period 1953-54 to 1960-61, and area irrigated by different modes of irrigation and the area under crops irrigated for the years 1950-51 to 1960-61. Tables 25.6 and 25.12 give summary figures on 'area irrigated' and 'area under crops irrigated' for the State, while other tables give district-wise information. These statistics are collected by the Directorate of Land Records, Madhya Pradesh, and published in its various publications mentioned in earlier section.

Section XXVI—Food and Grow-More-Food

Information relating to internal procurement, issues and closing stocks of foodgrains with State and Central Governments and fair-price shops and issue of foodgrains from them, for the period 1957 to 1961, is given in tables 26.1 and 26.2. The next two tables give data regarding foodgrains and non-foodgrains stocked by various warehouses and bank advances against warehouse receipts, during 1959-60.

Table 26.5 gives statistical information on the targets and achievements of additional production of foodgrains during 1956-57 to 1961-62, while the next two tables give an account of targets fixed and achievements under the 'Works' and 'Supply' schemes of the Grow-More-Food Campaign. Works schemes are concerned with minor irrigation works and land improvement measures while the supply schemes are concerned with the distribution of fertilizers, manures, improved seeds and improved agricultural implements and machinery. These Grow-More-Food statistics are collected and compiled by the Directorate of Agriculture, Madhya Pradesh.

Details about the taccavi and land improvement loans advanced to cultivators and recoveries made during the period 1956-57 to 1960-61 are given in the last table. Such loans are advanced under the 'Agriculturists Loans Act' and 'Land Improvement Loans Act' of the State Government.

Section XXVII—Forests

This section deals with the available forest statistics relating to forest area under the management and administration of the Forest Department. Details regarding forest area by legal status, working of forests under various systems of management area under forests open and closed for grazing and animals grazed, outturn of major forest produce and value of major and minor forest produce exploited by different agencies, sale of major and minor forest produce, revenue receipts and expenditure of Forest Department, are given in various tables.

Reserved forest is one which is permanently dedicated either to the production of timber or other forest produce and in which right of grazing and cultivation is seldom allowed. In protected forests, these rights are allowed subject to a few mild restrictions, while the unclassified forests consist largely of inaccessible forests.

Under 'major produce' are included timber, round wood, fuel wood, pulpwood and charcoal wood, while the 'minor produce' covers bamboo, canes, fodder, grass, gums, resins, lac, harra, katha, drugs and spices, tanstuff, dyestuff, tendu leaves, etc.

Tables 27.13 and 27.14 give the revenue receipts of Forest Department for each forest circle and by agencies/sources respectively for the period 1st November 1956 to 1960-61. These revenue figures cover the receipts on account of the removal of timber and other forest produce from forests by Government agencies, consumers and purchasers, drift and waif wood and confiscated forest produce, revenue from forests not managed by Government, etc.

The annual report of the Chief Conservator of Forests, Madhya Pradesh, gives more exhaustive and comprehensive data.

Section XXVIII—Livestock and Animal Husbandry

Livestock and poultry statistics (classified by age in certain cases) based on the quinquennial Livestock Census, 1961, separately for each district are given in Table 28.1. Detailed statistics are published in the quinquennial 'Census Reports on Livestock Population and Agricultural Implements' and 'Season and Crop Report, Madhya Pradesh' issued by the Directorate of Land Records, Madhya Pradesh.

The tentative estimates on the annual production of milk, average yield of milk per animal, utilization of annual milk produced according to different products, and production of raw bones, worked out by the Directorate of Marketing and Inspection, Ministry of Food and Agriculture, Government of India, on the basis of Livestock Census, 1951 and 1956, are contained in Tables 28.2 to 28.4.

The remaining tables under this head deal with the mortality from contagious diseases and other causes amongst livestock, results of preventive inoculation against diseases in livestock, animals treated and castrated at veterinary hospitals and dispensaries, working of quarantine stations and check stations, working of Madhya Pradesh Vaccine Institute, Gwalior, and livestock slaughtered in recognised slaughter houses, etc. The last table 28.16 gives a review on the working of Government Dairy Farms during 1958-59 to 1960-61.

The 'Annual Administration Report of the Veterinary Department', issued by the Directorate of Veterinary Services, Madhya Pradesh, gives detailed information.

Section XXIX—Agricultural Implements and Machinery

Districtwise numbers of agricultural implements and machinery, based on the quinquennial 'Census of Livestock Population and Agricultural Implements, 1961', are given here. Such statistics are also reproduced in annual publication 'Season and Crop Report of Madhya Pradesh' issued by the Directorate of Land Records, Madhya Pradesh.

Section XXX—Minerals

The mineral statistics up to the year 1955 were collected for the mines covered under the Indian Mines Act, 1952, by the Chief Inspector of Mines, Government of India, Dhanbad. These figures were supplemented to the extent possible in respect of non-Act mines from the Annual Reviews of Mineral Production of India, issued by the Geological Survey of India. From 1956, the bulk of the statistics are based on the returns received and compiled under the Minerals Conservation and Development Rules, 1955 and 1958, by the Indian Bureau of Mines, Government of India. The Minerals Conservation and Development Rules, however, do not cover Coal, Salt (sea), petroleum, atomic energy minerals, and certain other minor minerals. Coal statistics regarding production, value, despatches, etc., continue to be collected by the Chief Inspector of Mines, Dhanbad. The Directorate of Geology and Mining,

Madhya Pradesh, is also responsible for the collection of such data on minor minerals besides information on royalties realised and licences issued, etc.

Tables 30.1 and 30.2 give data relating to the quantity of minerals exhumed and value of minerals for the years 1951 and 1955 to 1961. The basis of valuation of all minerals is the pit's mouth-value of production, and the stage of measurement of quantity is normally the mine output which refers to the form in which minerals are extracted but also includes the product after the usual processing operations done at mine site. Mineral statistics are published in the following reports:—

- (i) 'Annual Report of the Chief Inspector of Mines, Dhanbad'.
- (ii) 'Mineral production in India'—(Annual),
- (iii) 'Coal Production in India (Monthly), issued by Government of India and 'Mineral Wealth of Madhya Pradesh (Quarterly), issued by the Directorate of Geology and Mining, Madhya Pradesh.

Section XXXI—Fuel and Power

Coal.—Table 31.1 gives statistics on production and despatches of coal classified by means of despatch for each of the coal fields located in the State for the period 1956 to 1961. The next table presents despatches of coal from all coal-fields in the country to different industries located in Madhya Pradesh for the years 1957 to 1961. Such statistics are published every month in 'Coal Production in India', issued by the Coal Controller, Government of India, Calcutta.

Production figures of coal derivatives at Bhilai Steel Plant are given in table 31.3.

Electricity.—Data relating to installed capacity, generation and sales of electricity by the public utility supply undertakings in Madhya Pradesh whether owned by Government, local authorities or private companies, are included in table 31.4. Military and factory power stations are excluded from the coverage. Figures for generation include purchases for public supply from non-public utilities, whereas power purchased from adjoining State is not included under the purchasing State as this is already accounted for in the corresponding generation figures of the selling State. The distribution of electricity for different consumption purposes is also given in the table.

Detailed statistics are annually published in 'Public Electricity Supply, All-India Statistics', issued by the Central Water and Power Commission (Power Wing), Government of India, Simla.

The last Table 31.5 shows the districtwise distribution of electrified towns and villages, Government and Private Power Houses in the State. This also gives information regarding the number of consumers attached to government power houses.

Section XXXII—Income and Wages

State Income.—The various tables on State Income given here, are based on the estimates worked out by the Directorate of Economics and Statistics, Madhya Pradesh, for the years 1950-51 to 1959-60. State Income has been considered to be the 'net domestic product at factor cost' originating within the geographical boundaries of Madhya Pradesh irrespective of the fact whether the income is owned by the persons living inside or outside the State. Comparative study of movement in the net domestic product (at factor cost) at current and constant (1952-53) prices is shown in table 32.1. The distribution of State Income by industrial origin and by sectors of economic activity primary, secondary and tertiary, at current and constant prices alongwith trends for the years 1950-51 to 1959-60 is given in tables 32.2 to 32.9.

Figures of *per capita* income of Madhya Pradesh and *per capita* income of certain States and the Indian Union are contained in the next two tables 32.10 and 32.11.

Wages.— Table 32.12 gives information regarding number, emoluments paid and *per capita* annual earnings of employees of Madhya Bharat Government Roadways for the years 1948-49 to 1961-62.

The next table gives the average annual earnings of workers employed in various types of Industries which have been grouped according to the International Standard Industrial Classification. Wages and earnings of factory workers are collected under the provisions of the Payment of Wages Act, 1936, which covers those factory employees, including clerical and supervisory staff, whose monthly earnings do not exceed Rs. 200 per month. 'Wages', as defined in the Act, cover all remunerations capable of being expressed in terms of money and payable under the terms of the contract. Such information about workers employed in the perennial industries only in the State is given for the years 1956 to 1959 in table 32.14.

Basic wages and dearness allowance fixed for the workers of Cotton Textile Industry at Indore for a standard month of 26 working days are given in table 32.15. The dearness allowance is linked to the consumers price index numbers for working class.

The wages earned by workers classified as underground miners and loaders, open working miners and loaders, surface workers, etc., in coalfields of the State, are given in table 32.16. The wages which ruled in the former State of Madhya Pradesh during the years 1951 to 1956 have been taken to represent the position in Mahakoshal region of former State of Madhya Pradesh as most of the important coalfields are located in this region. Comparative figures for All-India wage rates are also given here.

Table 32.17 presents the agricultural wages paid to persons engaged in various agricultural operations and activities closely related to agriculture for the years 1957 to 1961. These wages are published in the monthly bulletin of 'Daily Wages of Agricultural and Rural Labourers in Madhya Pradesh' issued by the Directorate of Land Records, Madhya Pradesh.

Section XXXIII—Labour and Employment

This section presents statistics relating to various aspects of organised labour such as employment, industrial disputes, absenteeism, strikes and lockouts, accidents, compensation paid, benefits from provident fund and bonus schemes, maternity benefits and working of Employees State Insurance Schemes, etc., working of Employment Exchanges and Employment in Public Sector Establishments.

Information regarding number of registered factories and employment therein by industry, group and sex and distribution of registered working factories according to the strength of workers is given in tables 33.1 to 33.5. These statistics are collected by the Chief Inspector of Factories, Madhya Pradesh, under the Indian Factories Act, 1948 and rules framed thereunder. The next table gives shiftwise average daily employment in Cotton Textile Mills in the State for the years 1958 to 1961. These figures are published in 'Monthly Indian Textile Bulletin' issued by the Textile Commissioner, Government of India.

Table 33.7 shows the trends of employment in Public Sector Establishments classified under Central, State and Quasi Governments and Local Bodies for the period 1958 to 1961. Such information is collected every quarter by the Directorate of Employment and Training, Madhya Pradesh and published in their reports.

Details about employment in shops and commercial establishment and the working of 'Shops and Establishment Act' in the State, are given in tables 33.8 to 33.9. The Act is in force only in certain municipal areas, towns and cantonments and hence the statistics relate to shops and commercial establishments in such areas. Statistics on average daily employment in and about important mines and persons employed above ground and underground for Mines covered under the Indian Mines Act, 1952 are given in Tables 33.10 and

33.11. The next table shows the number of working coal mines and average daily employment in coalfields in the State from 1958 to 1962. The employment figures for each coalfield are obtained by dividing the total number of man-shifts worked by the average number of working days.

Tables 33.13 to 33.16 give information regarding registrations, placings, submissions, vacancies notified, and distribution of applicants on live registers by occupations, age groups, and sex. These statistics are maintained in the Directorate of Employment and Training, Madhya Pradesh. The information for the years 1957 to 1960 on industrial disputes and industrial lockouts collected by the Labour Commissioner, Madhya Pradesh, and data on accidents and compensation paid under Workmen's Compensation Act, 1923 are given in tables 33.17 to 33.19.

Data regarding fatal and serious accidents in and about various mines as collected under the Indian Mines Act, 1952 by the Chief Inspector of Mines, are given from 1953 to 1960 in table 33.20. The next table presents information regarding man-shifts worked and percentage of absenteeism in coal mines for the period 1958 to 1962. The two concepts of number of man-shifts worked and percentage of absenteeism used are as follows :—

- (i) Average number of working days represents mode average of the number of days worked by the largest number of mines in the field.
- (ii) Percentage of absenteeism represents the number of man-shifts lost on account of absence as a percentage of the number of man-shifts scheduled to work.

Tables 33.22 and 33.23 give information regarding the working of Coal Mines Provident Fund and Bonus Schemes during 1956-57 to 1959-60, and maternity benefits paid in various mines during 1957 to 1959, respectively.

The last table deals with the working of Employees' State Insurance Scheme in the State during 1959 to 1961. The scheme covers those perennial factories employing 20 or more persons on any day during the last twelve months as defined in Employees, State Insurance Act, 1948.

The labour statistics are collected and maintained in the State by the office of the Labour Commissioner, Madhya Pradesh, under the various statutory enactments and also on voluntary basis. These are supplied to the Labour Bureau, Government of India, Simla for incorporation in the following publications issued by it :—

- (i) '*Indian Labour Statistics*'—Annual.
- (ii) '*Indian Labour Journal*'—Monthly.

Section XXXIV—Manpower

Detailed statistics regarding the requirements, outturn, supply and [shortage of technical personnel in the fields of engineering, agriculture, veterinary, dairying and fisheries, and medical and public health, are given in the various tables under this section. Figures on the shortage at the end of the Second Plan period and estimated shortage or surplus technical personnel at the end of the Third Five-Year Plan, are also given in these tables. These estimates have been worked out by the Directorate of Economics and Statistics, Madhya Pradesh.

Section XXXV—Trade Unions

Details about the membership, income, expenditure, opening and closing balances of trade unions classified according to the industrial classification, are presented here. The information relates to those unions, registered under the Indian Trade Unions Act, 1923, whose returns have finally been accepted. The Registrar of Trade Unions, Madhya Pradesh, is responsible for the collection and compilation of such data on Trade Unions and Federation

Section XXXVI—Industry

Cotton Mills.—Weekly statistics regarding cotton ginned and pressed by Cotton and Pressing Factories in the State, are collected by the Agriculture Department, Madhya Pradesh, and are published in weekly 'Madhya Pradesh Gazette' and monthly 'Agricultural Situation in India', issued by the Food and Agriculture Ministry, Government of India. Such statistics are given in table 36.1 for the years 1956-57 to 1959-60. The cotton pressing year is from 1st September to 31st August of the following year.

Detailed data regarding machinery installed and used in spinning and composite mills, processing equipment, workers employed, production and purchase of yarn (by counts), production of cloth (by variety), delivery and stock of yarn and cloth, etc., are collected and compiled every month by the Directorate of Economics and Statistics, Madhya Pradesh from the CST returns furnished by the mills under the Cotton Textile Order, 1948. Such statistics are also collected and compiled by the Textile Commissioner, Government of India, and are published in the monthly 'Indian Textile Bulletin'. Production figures of yarn and cloth in Madhya Pradesh during the years 1950 to 1961 are given in table 36.2, and similar details for each individual mill for the years 1959 to 1961 are contained in the next two tables 36.3 and 36.4.

Selected Industries.—Production figures for selected organised industries, viz., sugar, molasses, cement, refractory and ceramic goods, matchboxes, leather goods and tannery, newspaper and straw-boards, iron and steel (Bhilai Steel Works), and jute goods, are given in tables 36.5 to 36.13. These statistics are based on the monthly returns received in the Directorate of Economics and Statistics, Madhya Pradesh, from the producing mills on voluntary basis.

The last two tables (36.14 and 36.15) give the production estimates of sticklac classified by varieties, and despatches of different kinds of lac by road or rail from the lac assembling/manufacturing districts in the State for the period 1957-58 to 1960-61. These figures are collected and released by the Indian Lac Cess Committee, Ranchi.

Section XXXVII—Consumption and Stock

Table 37.1 presents information regarding consumption of raw cotton classified by varieties, and consumption of yarn in Cotton Textiles in Madhya Pradesh for the period 1958 to 1961. The next table gives data on cotton cloth and yarn delivered for civil consumption by mills. These statistics are collected every month by the Textile Commissioner, Government of India, and are published in the monthly 'Indian Textile Bulletin'. Monthly information regarding approximate stock of coal with coal mines from December 1959 to February 1962, is given in the last table 37.3 under this section. These figures are collected and published by the Coal Controller, Government of India.

Section XXXVIII—Transport and Communication

Information regarding railway route mileage in the State as existing on 31st March 1956 and classified separately for each railway zone, is given in table 38.1. In calculating this, the length of route, double or treble lines, is counted only once. The Railway Board, Government of India, is responsible for the collection and maintenance of railway statistics.

Tables 38.2 and 38.3 present data regarding length of national highways as existing on 1st April 1956, and length of classified roads as existing on 1st April of 1957 to 1960, in each P. W. D. Circle in the State. The next table 38.4 shows circlewise (P. W. D.) length of surfaced roads of various classes of motorable earth roads for the years 1957 to 1959, whereas table 38.5 gives Divisionwise (P. W. D.) data on length of roads existing on 1st April, of the years 1948, 1952, 1956 and 1960. These statistics refer only to roads maintained by Public Works Department (B and R) and are published in the Annual Administration Report of the Public Works Department, Madhya Pradesh.

The transport statistics regarding registration of motor vehicles, motor vehicles on road, revenue receipts from road tax, licence and permit fees, etc., are collected and maintained on quarterly and annual basis in the office of Transport Commissioner, Madhya Pradesh. Tables 38.6 to 38.9 give regionwise information on number of motor vehicles plying on road and new registrations for the period 30th June 1957 to 31st December 1961; revenue receipts from vehicles; taxes and fees for 1957-58 and 1958-59, and growth of motor vehicles in different cities of the State during the years 1950, 1955 and 1960.

Tables 38.10 to 38.14 deal with the working of State Transport Services, *viz.*, Madhya Bharat Roadways and Central Provinces Transport Services.

The last two tables under this section present the distribution of post-offices and details regarding the services rendered by the post-offices under each postal division existing in the State.

Section XXXIX—Trade

Information on foodgrains exported from and imported into Madhya Pradesh is given here. The figures are based on the invoices relating to consignments received at each railway station from various trade blocks under which the former Madhya Pradesh State was treated as a single trade block. They include information for Vidarbha region (now a part of Maharashtra State), but adjustments for inter-block trades of erstwhile Madhya Pradesh, Madhya Bharat, Vindhya Pradesh and Bhopal have been made.

Statewise statistics on the subject are monthly and annually collected and published in 'Accounts Relating to the Inland (Rail and River-Borne) Trade of India', by the Director General of Commercial Intelligence and Statistics, Calcutta.

Section XL—Planning

Statistics relating to the outlay and progress of expenditure on different development schemes classified under the main heads 'Production Sector' and 'Social Services Sector' during First and Second Five Year Plans, alongwith outlay for the Third Five Year Plan are given in table 40.1. The next table presents detailed information on the distribution of plan outlay according to various heads of development during Second and Third Plans. The Plan statistics are published annually in the 'Annual Development Plan of Madhya Pradesh' by the Planning and Development Department.

The last table shows the grants and loans sanctioned for the State Handicrafts Scheme by the Central Government.

Section XLI—Community Development Programme

Table 41.1 gives information on area, population and villages covered in each year of the programme during 1952-53 to 1961-62, while the next table 41.2 presents details for each type of development block as existing on 30th September, 1961, in the State. The progress of selected physical achievements under Community Development Programme during 1956-57 to 1960-61, is given in the last table 41.3.

These statistics are based on the Quarterly and Annual Progress Reports received from the blocks by the Planning and Development Department, Madhya Pradesh.

Section XLII—Scheduled Castes and Scheduled Tribes

Table 42.1 gives district-wise distribution of scheduled castes and scheduled tribes population as per Census, 1961 results. The next table incorporates data regarding grant-in-aid and expenditure incurred on various schemes for the development of scheduled areas and welfare of scheduled castes and scheduled tribes and other backward classes for the years 1956-57 to 1960-61. Schemewise break up of expenditure incurred under State Sector and Centrally sponsored programme for the welfare of these classes, is given in table 42.3.

Statistics regarding education, scholarships awarded, and services rendered by employment exchanges, in respect of scheduled castes, scheduled tribes, and backward classes are given in the next three tables 42.4 to 42.6. Statewise statistics in sufficient detail on the

subject are published in the annual reports of the Commissioner for Scheduled Castes and Scheduled Tribes, issued by Government of India.

Section XLIII—Elections

Electoral Statistics regarding the number of candidates, voters, constituencies, seats allotted and votes polled for the purpose of representation in Lok Sabha and State Vidhan Sabha, are given in this section. The figures relate to the third General Election held in 1962.

Table 43.1 gives the number of reserved seats for scheduled castes and scheduled tribes candidates and unreserved (general) seats for representation in Lok Sabha and Vidhan Sabha. The next two tables give the distribution of candidates nominated, at poll, elected and those who forfeited deposits, according to political party affiliations for elections to Lok Sabha and Vidhan Sabha respectively.

Tables 43.4 and 43.5 contain detailed information on each constituency for Lok Sabha and Vidhan Sabha, regarding number of electors and votes polled classified by sex, valid votes polled, votes rejected and number of candidates contested. The difference between 'votes polled' and 'valid votes polled' is on account of the fact that a number of votes polled were either wrongly polled or rejected.

Such statistics are collected and maintained in the office of Chief Electoral Officer, Madhya Pradesh.

Section XLIV—Miscellaneous

Table 44.1 gives the names of various Indian Princely States which coalesced to form the former States of Madhya Pradesh, Madhya Bharat, Vindhya Pradesh and Bhopal.

Details regarding the capital structure, financial operations, production, employment position, etc., for principal public sector undertakings in the State, are contained in table 44.2.

The distribution of towns having water-works (as on 31st March 1962) alongwith population covered (Census, 1961), and ownership of the plant, is given in the next table 44.3.

The subsequent tables 44.4 to 44.7 deal with the working of public fire-brigades located in the State. Fire appliances available with the stations, number of fire risks covered by stations, estimated value of property lost due to fires reported to stations, etc., are given in these tables for the year ending December, 1960. Table 44.8 gives similar information regarding the Police Fire-Brigade, Indore.

The last table shows the distances by road from Bhopal to various district headquarters of the State.

Section XLV—All India Statistics

Selected tables containing latest available statistics on Indian Economy are presented under this section.

Information regarding area and population of re-organised States and centrally administered territories, as per Census, 1961, is given in table 45.1. The next two tables give comparative movement of National Income at 'current' and 'constant' prices, for the period 1948-49 to 1960-61.

Figures on area and yield of principal crops in India from 1951-52 to 1960-61 are given in table 45.4. These figures are also given in 'metric units'.

Tables 45.5 to 45.9 incorporate certain economic trends relating to agricultural, industrial and mineral production and wholesale prices in India.

Detailed plan statistics relating to outlays of first, second and third five year plans for States and Union Territories, distribution of plan outlays by major heads of development (public sector only) during these plan periods, and outlays on and cost of physical programmes in the second and third plans, respectively, are incorporated in the last three tables.

All India Statistics have been incorporated with a view to enabling a comparative study of the State's economy *vis-a-vis* that of other States and the country as a whole.

STATISTICAL ABSTRACT OF MADHYA PRADESH 1961-62

GENERAL NOTES

Area covered—

Except where otherwise stated all the statistics contained in this Abstract relate to the New State of Madhya Pradesh as reorganised on the basis of States Reorganisation Act, 1956. Although necessary adjustments have been made wherever feasible for the transfers of Sunel Tappa from the former Mandsaur District of Madhya Bharat Region to Kotah District of Rajasthan and Sironj sub-division (Sunel and Lateri tahsils) of Kotah District of Rajasthan to Vidisha District of Madhya Bharat Region, in certain cases the figures for periods earlier to the calendar year 1956 and financial or agricultural year 1955-56 could not be adjusted for want of required breakdowns. On account of this, comparison of figures over a series of years is to be made keeping in mind this limitation. Wherever adjustments have not been possible, the footnote given at the end of the table makes special mention of the fact that no adjustments have been made for Sunel enclave or Sironj sub-division.

Revisions—

Some figures presented in the Abstract differ with those published earlier in other statistical publications of this Directorate or State Government. This is because of the fact that these figures have been revised by the agencies supplying data, or some improvements have been made in the coverage and scope of data published earlier. Provisional figures incorporated in the Abstract will be revised as soon as the final figures are available.

Notes, abbreviations and signs—

Wherever special notes are required with reference to a particular table, they are given at the bottom of the tables or in explanatory notes. The following abbreviations and symbols have been used in the publication:—

.. or N. A.	=	Not available
— or Neg.	=	Nil or Negligible
P	=	Provisional
R	=	Revised
mt.	=	Metric Tonne
kg.	=	Kilogram

Units—

Some of the units of measurements and conversion ratios used in the publication are explained below.—

One lakh	=100,000
One crore	=10,000,000
One maund	=82 2/7 lbs. =37.345 kg.
One ton (long)	=2240 lbs. =1.01605 metric tonnes*
One cwt.	=112 lbs. =50.8 kg.
One pound	=0.4536 kg.
One inch	=2.54 centimetres
One foot	=0.3048 metre
One yard	=0.9144 metre
One mile	=1609.344 metres
One acre	=4840 sq. yds. =0.404686 hectare
One sq. mile	=2.58999 sq. kilometres
One Gallon (Imp.)	=4.54596 litres

For the conversion of temperature in Fahrenheit (F) to Centigrade (C) the relation used is $C = 5/9 (F - 32)$.

(1) Includes Jowar, Bajra, Maize, Ragi, Small Millets and Barley besides Rice and Wheat.

(2) Includes Gram, Tur and other Pulses.

(3) Includes Groundnut, Sesamum, Rape and Mustard, Linseed and Castor seed.

(4) Includes Mesta.

(5) Comprises Sugarcane, Tobacco, Potato, Pepper, Chillies and Ginger.

*Based on Provisional Estimates.

Note.—The indices for 1953-59 and 1959-60 are generally based on partially revised estimates while those for 1960-61 are based on Final Estimates. The indices for these years are, therefore, subject to revision.
