PREFACE

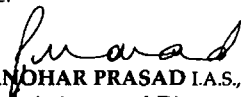

The Handbook of Educational Statistics is an annual publication of the Department of School Education and the present one is for the year 2003-04. Recognizing that reliable data are critical in guiding efforts to improve education in the state the Department gathers statistics on the condition and progress of School Education in the State.

The primary purpose is to provide a compilation of educational statistical information covering the broad field of school education from Primary stage to Higher Secondary stage. It includes data from many sources both government and private collected through specially designed formats from all the educational institutions dealing with School education.

The Handbook is divided into two parts. Part I deal with the state level information and Part II deals with the District wise details. The publication contains information pertaining to the Educational Institutions, students, teachers, educational indicators, budget and expenditure. In addition to updating the previous data the current edition contains a significant amount of new information on rural and urban population, SC and ST population, district wise and management wise teachers and students.

I hope this publication will be of immense help to all those engaged in the field of Education. Your valuable suggestions for further enrichment of the Handbook are welcome.

"That service is the noblest which is rendered for its own sake"

"Action expresses priorities"

"An ounce of practice is worth more than tons of preaching"

— Mahatma Gandhi
