INTRODUCTION

Immediately after the setting up of the State Statistical Bureau in the year 1949, consistent efforts have been made to bring out an Abstract of Statistics for Orissa containing all available statistical information from the time Orissa was made a separate state. In the beginning, it appeared comparatively easier to complete the work within a short time. But when attempts were made to bring together statistical information from different offices of the Government there were various problems to be tackled in the way of getting those information from the individual departments. The proposal of printing the Abstract of Statistics for Orissa was initiated by the middle of August 1950 and it was pursued through many ups and downs. The printing could only begin by the middle of February, 1954. There were 128 tables in all to be printed. Out of those 128 tables, Volume I contains the first 72 tables. Steps are being taken to print the remaining 56 tables in Volume II.

2. Publication of this Abstract will be a unique feature in the history of Governmental activities in Orissa as it brings together all available statistics since the creation of the State as a separate administrative unit. This publication will not only be useful as reference book to the Administrators but also to the interested public. It is to be admitted that the present publication is not an ideal one. The materials presented are not exhaustive nor could all information be supplied for want of sufficient data. This is, however a humble beginning which, it is hoped, with the co-operation of all concerned, will be brought to a successful compilation sooner or later.

3. The contents of the Abstract are taken from a large number of sources. The names of the departments and organisations responsible for providing each series of statistics are noted below each table.

4. Readers are requested to make their needs known to the Bureau and put forward comments and suggestions relating to the improvement of the publication. Such suggestions will be always welcome and carefully considered in planning future editions.

The co-operation extended by different Departments of the Government in the preparation of this publication is gratefully acknowledged.
