FOREWORD

This is the third issue of the Statistical Outline of Andaman and Nicobar Islands giving the latest information available upto the end of 1961. It is hoped that this publication will be found useful by all those who are interested in the development of these beautiful tropical islands. Any suggestions to enhance the utility of this brochure will be welcome.

B. N. Maheshwari, Chief Commissioner, 23rd February 1962. Andaman and Nicobar Islands.

PREFACE

This is the third issue of the Statistical outline of Andaman and Nicobar Islands being published annually by the Statistical Bureau since 1959. The issue of 1961 could not be published due to some unavoidable circumstances. The pattern of the publication largely confirms with the previous issues and all possible efforts have been made to bring the data upto date under all the aspects of economic and social developments. In order to enhance the utility of the publication we have, however, incorporated quite a number of new tables also.

The data contained in this publication has been processed in the Statistical Bureau from the information obtained from various departments of this administration and I acknowledge with gratitude their co-operation in helping the Bureau to compile the present brochure.

How to use the table:

Suppose a commodity is priced at Rs. 2.50 per pound. To find out the price per Kilegram, look up the table 'A' against Rs. 2/pound. The value is Rs. 4.41/kg. Then look up the table 'B' against 50 nP./pound. The value is 1.10 nP./kg. Add up the two (Rs. 4.41 + 1.10 = Rs. 5.51). The price per Kilogram is, therefore, Rs. 5.51.

The value is Rs. 2.14/kg. Then look up the Table 'B' against 50 nP./Seer. The value is 0.54 nP./kg. Add up the two (Rs. 2.14+0.54 = Rs. 2.68).

The price per Kilogram is, therefore, Rs. 2.68.

How to use the Table:

- (1) Find the required number from Column (N)
- (2) Look up the required value under appropriate column.
- (3) Columns (1) and (1A), (2) and (2A), (3) and (3A), (4) and (4A), should be read together. For example values from (I) and (1A) can be converted but not from (1) and (2A).
- Example: (1) To convert 20 tolas into grams and milligrams, look up 20 under column (N) and find the equivalent under (1A) viz. 233 grams, 276 milligrams. For converting 20 grams look up under column 1. The value is 1.71 tolas.
 - (2) To covert 50 kilograms into seers, look up 50 under column (N) and find the equivalent under column (2) viz. 53 seers, 47 tolas. To convert 50 seers look up under column (2A). The value is 46 kg. and 655 grams.
