Acknowledgement

We thank Smt. Sandhya Venugopal Sharma, IAS, State Project Director, SSA Karnataka, Mr. Kulkarni, Director (Programmes), Mr. Hanumantharayappa - Joint Director (Quality), Mr. Bailanjaneya, Programme Officer, Prof. A. S. Seetharamu, Consultant and all the staff of SSA at the head quarters for their whole hearted support extended for successfully completing the study on time.

We also acknowledge Mr. R. G. Nadadur, IAS, Secretary (Primary & Secondary Education), Mr. Shashidhar, IAS, Commissioner of Public Instruction and Mr. Sanjeev Kumar, IAS, Secretary (Planning) for their support and encouragement provided during the presentation on the final report.

We thank all the field level functionaries specifically the BEOs, BRCs and the CRCs who despite their busy schedule could be able to support the field staff in getting information from the schools.

We are grateful to all the teachers of the small schools visited without whose cooperation we could not have completed this study on time. We thank the SDMC members and parents who despite their daily activities were able to spend time with our field team and provide useful feedback about their schools.

ANNEXES

ANNEX – 1: TERMS OF REFERANCE (TOR)

ANNEX – 2: LIST OF SMALL SCHOOLS

ANNEX – 3: QUESTIONNAIRE

ANNEX – 4: LIST OF 123 SCHOOLS ALREADY CLOSED

ANNEX – 5: LIST OF 972 SCHOOLS TO BE CONTINUED

ANNEX – 6: LIST OF 166 SCHOOLS WITH UP TO 10 ENROLMENT TO BE CONTINUED

ANNEX – 7: LIST OF 323 SCHOOLS TO BE CONTINUED MERGED

ANNEX – 8: SAMPLE VILLAGE MAPS SHOWING NEIGHBOURHOOD SCHOOLS

1. Executive Summary

The Governing Council of Sarva Shiksha Abhiyan (SSA), Karnataka Mission felt the need for conducting a feasibility study of all the primary schools with enrollment up to 10 children. In this regard, Catalyst Management Services Pvt. Ltd (CMS) Bangalore entrusted for conducting the study. This report is prepared based on the information collected in 1585 small schools (as per the list provided by SSA).

The study envisaged complete enumeration survey of all small schools, which is defined as schools with enrolment of up to 10 children. Thus, based on the 2008 – 09 data on enrolment of children, there were 1585 schools with enrolment of 6 to 10 children was provided. All these schools were visited and information on trend in enrolment over the last nine years has been collected. In addition, information on infrastructure facilities available in the schools and the human resources, teacher and community perception have been collected.

The distribution of 1585 small schools is observed to be concentrated in 13 districts (85% of the schools). In six districts namely Hassan, Tumkur, Chikmagalur, Uttara Kannada, Ramanagara and Mandya 841 (53%) small schools are located with more than 100 in each district. In 7 districts namely Shimoga, Kolar, Bangalore (Rural), Chikkaballapura, Chitradurga, Madhigiri and Mysore the number of small schools is in the range of 50 to 100 and the total number of small schools is 499 (32%).

The growth in the population in these districts indicates 1.03% annual growth in districts with high density small schools, while it is 1.38% and 1.75% in other categories of districts.

The study observed that 1461 (92%) are working and 123 (8%) schools are closed. The closure of the schools is due to low enrolment of children which are merged with other schools in the neighbourhood. The medium of instruction of the closed schools shows that Kannada schools are more as compared to other types of schools. It is seen that most of the schools closed (113 out of 123) are in the last one year. The number of schools closed based on the medium of instruction reveals that most of the Kannada schools have been closed more than a year ago as compared to other medium schools which are closed in the last six months.

It is seen that 49% of 1461 working schools are 10 to 25 years old followed by 30% of the schools which are 25 to 50 years old. There are 8% of schools which are more than 50 years old and few of them are as old as a century. There are 6% schools which are as new as 2 to 3 years established across the state.

The average distance to GP is about 4.5 kms from the school indicating that the small schools are located in other villages of the GP main village. It is seen that only 109 (8%) of the 1461 working schools are located in the GP head quarter villages which includes some of the schools located in the urban areas.

The average number of rooms available in 1461 working schools is 2 and varies across schools in the range of 1 to 16. The maximum number is seen in GLPS Mirkhal, Bidar district, Basavkalyan Block, Beluru Cluster. One third of the schools are single room schools, while nearly 45% of the schools have 2 rooms. There are few schools where the number of rooms available is more than 5. The number of rooms used for instructional purposes among the total available rooms is only one. This is obvious because of low enrolment of children. Also, in schools having more than 2 rooms, all rooms are not used for instructional purposes.

Functioning toilet for children and electricity facility is available in more than 75% of the schools. However, availability of drinking water facility for children is seen in 54% of the schools only. The other three facilities – compound, ramp and play ground - are available in about 25% of the working schools only.

The trend in the number of teachers by gender in the 1461 working schools during the nine year period shows a declining trend during 2001 to 2006 and increasing in the next two years and again declining in the last two years. This decline is more among the male teachers as compared to female teachers whose number is continuously increasing excepting in the year 2009 – 10. The percentage of female teachers over the nine years is continuously increasing from 36% to 43%. However there has been a fluctuation in the annual rate of increase. OBC & General category teachers are over 60% followed by SC and Muslim groups who are almost same (15%). The other two groups namely the ST and other Minority (mainly Christians) teachers constitute less than 5%. The average length of service of teachers in the small schools is about 6 years. The tenure of services of the teachers in the small schools indicates that 17% of the teachers are having over 10 years followed by 33% with 5 to 10 years. More than one fourth of the teachers are having 2 to 5 years tenure while less than one fifth are in the range of 1 to 2 years tenure. Less than 5% of the teachers are new to the small schools with less than a year of service. The annual growth rate in the number of teachers in the working schools over the last nine years calculated based on the exponential trend ($y=a*b^t$, y =number of teachers, t = no. of years) indicates that the overall growth rate is 1%. The genderwise growth rate shows negative growth of male teachers as compared to over 3% among female teachers. Across the different social groups, the annual growth rate is higher among the ST teachers (2.12%) as compared to other groups of teachers.

The distribution of children by gender in the 1461 working schools over the last nine years is almost similar over the years both in enrolment and retention. However, in absolute numbers, there is a declining trend in enrolment status over the period. The retention rate between boys and girls over the period shows that retention of girls is marginally higher than boys. The overall trend in the enrolment and retention of children in 1461 working schools indicates that over 5% annual decrease in both enrolment and retention rates. The annual percentage change shows a continuous declining of enrolment and retention with highest reduction seen during 2006 – 07 and 2008 – 09. The declining changes are more among the boys as compared to girls. However, there has been a positive change in the year 2009 – 10 as compared to 2008 – 09.

Teachers perceive that the two most important reasons for low / declining enrolment of children in the schools are less population leading to lesser number of children in the LPS level and due to opening of private schools in the nearby areas. The suggestions made by teachers for improving the enrolment in the small schools are:

- introduction of English language so that it will reduce children going to convent schools where English is the medium of instruction;
- providing all basic facilities that makes the small schools look like private schools to attract the parents and children;
- to track anganwadi children for enrolment in government schools only;
- creating awareness among the community about the benefits from government schools;
- increase the class from 5th to 7th in villages where sufficient number of children are going for HPS in the neighbourhood schools so that higher standards are available in the village school itself rather than going outside;
- providing transport facilities to the neighbouring village children who are going to outside schools;
- increasing the number of teachers so that in case of meetings to be attended by teachers, there will be alternate teacher to run the school;
- opening of ananganwadi for urdu children will improve the enrolment in urdu schools;
- teaching method has to be improved and attractive like that of convent schools;
- stopping children who are migrating with the family by making arrangements for residential schools;

The three most important reasons that the community feels for low and declining enrolment in their schools are:

- adoption of family planning leading to lesser children in villages;
- because of less children in the families, sending the children to the private schools either in the same place or in the nearby place;
- migration of labour households has affected the enrolment status in the schools as economically well off families are sending their children to nearby convent and private schools;

Community feels that the enrolment in their schools could be improved through the following measures:

- not giving permission to start private schools;
- introducing English subject in the schools;
- improving the basic facilities in the school;
- providing good and committed teachers;
- improving the quality of mid day meals;
- increasing the class up to 7th standard so that girls will continue in the same place rather than dropping out from the school;

Out of the 1461 working schools, community in villages of 1364 (93%) schools unequivocally expressed for non closure of the schools. The community have expressed various reasons for continuing the schools. The most common reasons expressed across all the regions are:

- problem of transport facility;
- problem of medium of instruction in other schools (for non kannada children- mainly urdu & marati medium schools);
- non-affordability for sending to private schools;
- accessibility in forest areas;

The community are apprehensive about the transport facility provision by the government. They express that even if the government provides transport facility, they want school in their villages. This is because of security of small children and girl students.

Continuance / Closure of schools

The trend in the children enrolment in 1461 working schools is declining at 5.6% annually between 2001 and 2010, while the average number of children per school has declined from 18 to 11. But, the enrolment of children in Classes 1 to 5 during 2009 – 10 in these schools is varying from as low as 1 to as high as 367. If Class 5 is excluded, then the children available for the 2010 – 11 enrolment will vary from 0 to 295. Also, it is essential to consider the number of children going to Anganwadi, who are the potential children for enrolment to these schools. Based on this proposition, it is seen that in nearly 70% of the schools the enrolment of children from Class 1 to 5 during 2009 – 10 is 10 children or less. If we remove Class 5 enrolment during 2009 – 10 (as children of 5th standard will move to HPS category schools) the percentage of schools with 10 children or less will increase to 81%. By considering the potential children available in the villages (based on the children enrolled in the Anganwadi centres where ever available & in places anganwadi centre is not available, the number of children in the age group of 3 to 5 years is based on the teacher and community estimation), it is seen that schools with less than 10 children for enrolment for the year 2010 - 11 will be reduced to 33%. This means that the immediate concern is to focus on these on these 33% (489) schools for feasibility of continuance / closure rather than on the remaining 972 schools where the enrolment is not an issue. However, it is seen in section 9.3 (networking of schools), out of the 489 schools with enrolment up to 10 children, in 166 of these villages children are not going to neighbouring schools for primary level. These 166 schools can not be closed or merged with neighbourhood schools. If done then the children drop out could be anticipated. Thus the current focus of merger is to be envisaged for 323 schools only.

Type of Schools for Continuance / Closure

The medium of instruction of the 489 schools that needs immediate concern for closure / merger reveals that Kannada schools constitutes 64%, Urdu schools 35% and 1% Marati schools. However, an analysis of the schools by different medium of instructions shows that 25% of the Kannada schools and 85% of the Urdu schools needs to be closed because enrolment is less than 10. The high percentage of urdu schools is due to the fact that the number of muslim children going to anaganwadi centres is not available. This needs to be considered while making alternate arrangements for children in urdu schools.

Neighbourhood Schools

The details of the neighbourhood schools from the 1461 working schools pertaining to number of schools, average distance, type of schools and approximate number of children going to the neighbourhood schools for 1 to 5th standard indicates that in 68% of the villages, children are going to neighbourhood schools for 1 to 5th standard. This is more among the urdu medium schools as compared to Kannada medium schools. All the three types of school management are seen in the neighbourhood. The number of government and private schools available in the neighbourhood is almost same i.e., for every one government LPS small school there is one government and one private school in the neighbourhood. Where as the number of aided schools in the neighbourhood is less. Access to the neighbourhood schools indicates that the average distance between the small school studied and the neighbourhood school is about 5 kms. This is more for the private schools (8 kms) as compared to government schools (3 kms) and aided schools (5 kms). The type of neighbourhood schools to which children are attending reveals that 1323 (60%) schools are of HPS category followed by 501 (23%) LPS and 386 (17%) Composite High Schools. On an average 8 children are going to the neighbourhood schools from the villages where small schools are located.

Actions Points

Based on the analyses of the data the feasibility of continuance / closure of small schools indicates that:

- 1) 123 schools are already closed and merged with nearby schools and is not an issue.
- 2) 972 schools could be continued for a minimum of three years. This is according to the current enrolment status and the potential children available for the next three years which is more than 10.
- 3) In case of 323 schools which will have enrolment of up to 10 children in the next three years, merger to the nearby schools have to be envisaged. However in case of urdu and marati schools, alternate strategies have to be adopted such as combining with the kannada schools with urdu / marati sections or continuing for one more year so that children may not drop out.
- 4) In order to create an working environment in small schools, the following aspects could be considered:
 - incentives could be provided to motivate the teachers to attend regularly in the small schools which are located in difficult terrains;
 - non teaching activities of the teachers need to be reduced (such as involvement in census, voter list verification, election duty, pulse polio programme etc.) so that they can focus on teaching and reduce away from school;
 - involvement of corporate sectors as partners would help in creating better infrastructure, enabling teaching environment and improvement in enrolment status.

2. Background

During the discussions in the Governing Council of SSA held on 4th February 2009, a need was expressed to study the feasibility of all primary schools with enrolment of 6 to 10 children in 1st to 5th standards. This requires merging of these types of small schools with nearby medium and large schools in the interest of viability and feasibility of management, economy of scale of operations and meaningful schooling for children.

In the above context, SSA Karnataka Mission invited Catalyst Management Services Pvt. Ltd (CMS) Bangalore to submit a proposal for carrying out the feasibility study of small schools. Accordingly, CMS submitted the detailed technical and financial proposals to SSA on 22nd August 2009. Based on the proposal and subsequent financial negotiation during November – December 2009, CMS were entrusted for conducting the study. The MOU was signed on 29th January 2010.

Initial discussion was held with the Consultant and Programme Officer of SSA regarding the tool to be used for getting information from the small schools. **Inception Report** was submitted to SSA on 9th February 2010 highlighting the progress of activities carried out as of 9th February 2010, Approach & Methodology, and tentative action plan for completing the study. The inception report was approved by SSA with suggestions in the survey tool (vide letter of SSA dated 16-02-2010).

The **Work Initiation Report** highlighting the overview of progress achieved as on 13th March 2010, list of small schools and the finalized tools used for data collection was submitted to SSA on 15th March 2010. Subsequently based on the suggestions of SSA, an addendum to this **Work Initiation Report** detailing the processes involved in the collection of data as specified in the finalized tool was submitted on 29th March 2010.

The **Draft Final Report** prepared based on the analyses of information collected in 1585 small schools was submitted to SSA on 26th May 2010. A presentation on the draft final report was made to the SSA on 13th July 2010 and subsequently to the Executive Committee on 4th August 2010. This **Final Report** is therefore prepared and submitted to SSA based on the discussions & suggestions made during the presentations.

3. Objectives and Scope of the Study

Objectives

The broad objectives of the study as specified in the TOR are:

- a. To examine briefly the *genesis, evolution and community context* of small schools;
- b. To examine the *shifts in enrolments and retention* matrix in the last 9 years (2001 – 2010) with special reference to sex, social class and neighborhood networks of access to LPS and HPS schooling and develop case profiles therein;
- c. To examine the *physical infrastructure facilities and human resources* available in small schools and develop a typology of schools on the basis of such facilities;
- d. To interact with local community and explore *reasons for declining enrolments*;
- e. To develop a *typology of small schools* on the basis of justifications for continuation or closure;
- f. To explore *alternative support systems for children* of every small school / community which may apparently face the prospects of closure;

Scope

Based on the 2008 – 09 data on enrolment, there are 1585 schools in the state with enrolment of 6 to 10 children. As per the TOR all these 1585 schools are to be visited and collect information focussing the above study objectives.

The detailed objectives and scope of the study as specified in the Terms of Reference (TOR) is attached at **Annex – 1** and the list of 1585 small schools provided by SSA is given in **Annex 2**.

4. Approach and Methodology

4.1 Principles followed:

As per the activities specified in the TOR (Annex – 1), CMS adopted the following principles during developing & designing and execution of the study:

- **Understanding expectations of the Study:** The first step followed in this study was having preliminary discussions with SSA personnel on the expectations from the study, tools development, getting the list of small schools and other logistical aspects related to the study process.
- **Qualitative and Quantitative Data** were collected for understanding the low enrolment in the small schools. Factors responsible for low enrolments has been analysed both interms of qualitative and quantitative data collected in the small schools. Qualitative analyses has been done based on the discussions with the parents and teachers, while quantitative analyses is done using information on the number of school going children in the village, access to other schools in the neighborhood, trends in the enrolment & retention status over the last one decade.
- **Sample Schools:** As suggested in the TOR all the small schools numbering about 1585 were visited and information has been collected related to the objectives of the study.
- **Participative process** was used during the entire study period. Key SSA personnel at the state and the district, block and cluster levels were consulted during the data collection period.

4.2 Sampling:

Based on the 2008 – 09 data on enrolment, there are 1585 schools with enrolment of 6 to 10 children (**Annex – 2**). As per the TOR all these 1585 schools were visited and information has been collected related to the study objectives.

4.3 Survey Design:

The hypothesis for the proposed study is that “Small schools have unique and distinct characteristics in functioning”. This is analysed by collecting historical data on enrolment & retention from each of the small schools and discussions with local community mainly parents, teachers, anganwadi teachers and available GP members.

4.4 Processes and Steps:

The study will go through following processes and steps:

Step 1: Design of Research Instrument in consultation with SSA nodal team.

Step 2: Administration of Research Instrument *in the sample districts;*

Step 3: Data entry and Compilation

Step 4: Analysis and Reporting of Qualitative and quantitative data and draft report preparation;

Step 5: Finalisation of Report incorporating the feedback from SSA on the draft report;

4.5 Questionnaire Development

Draft questionnaire for data collection from each school was prepared and submitted to SSA for approval. Discussion was held with Consultant and Programme Officer of SSA on this draft questionnaire. The following three aspects were suggested by the Consultant to incorporate in the questionnaire:

- i. Mapping of all schools within a radius of less than 5 kms from the small school being studied (sample maps are given at **Annex-8** and the soft copies of maps of all small schools are given in the CD);
- ii. Community views on alternate schooling arrangements if the existing school in their village is closed;
- iii. Availability & Access to transportation and condition of road network to the village;

Based on the above suggestions, the questionnaire was finalised and administered in all the small schools. The detailed questionnaire is given at **Annex – 3**.

4.6 Data Management:

SPSS package and Excel have been used to data punching and analyzes of the quantitative and qualitative data collected from each school. The analysis is done at aggregate, district and school levels to assess the feasibility of continuing / closing of the small schools studied.

4.7 Quality Control and Field Management Issues

To ensure quality outputs the followings measures were adopted:

- Ø Filed Survey was done by experienced Research Investigators with a supervisor monitoring each team. About 125 research investigators were employed in teams for carrying out the survey. The team size varied between 4 to 12 members depending on the number of small schools to be visited in each district. On an average a field staff covered about 13 schools and took about 1.5 to 2 days per school for data collection.
- Ø Team Leader and Team Coordinators continuously monitored the field activities through random visits to the sample schools.
- Ø Every day the team supervisor along with the team members verified the questionnaire to see that only relevant and correct information are collected.
- Ø At the data entry stage random checks were initiated for reducing data entry errors.
- Ø Field team has to go more than once to a school because local school holidays and also due non availability of teachers.

4.8 Limitations

The study tried to capture relevant information from all the stakeholders. However, the following limitations are inevitable:

- Ø It is not possible to get information on the number of children who were enrolled and retained in schools which were already closed due to low enrolment.
- Ø The community level discussions were held in different groups due to their non availability at the time of visit. However, all the parents have been contacted collectively in most of the places and tried to get their opinion about continuing / closing of the school.
- Ø The list of children going to other schools in the neighbourhood of these small schools have been collected where ever the community / teacher were able to provide them. However, the number of children and the names of the schools to which these children enrolled are available. This will give the network of schools in the neighbourhood of the small schools visited.
- Ø In places where anganwadi centres are not available, children in the age group of 2 to 5 are obtained from the teacher based on the child census of 2010.

5. Current Status of Schools

The current status of small schools based on the list provided by SSA is analysed in this section. It focuses on the total number of small schools, number of working & closed, medium of instruction of closed schools and the number of years since they are closed.

5.1 Total Small Schools

The total number of small schools (with an enrolment of below 10) based on the list provided by SSA is 1585. However, in the list provided, one school in Kolar district is repeated (GLPS Uragamadigapally in Srinivasapura block) and hence the total number of small schools is 1584. Based on this list, the density of small schools vis-à-vis the decadal population growth during 1991 – 2001 indicates the following:

In Hassan, Tumkur, Chikmagalur, Uttara Kannada, Ramanagara and Mandya districts 53% (841) of the small schools are concentrated. The combined average annual population growth in these districts during 1991 – 2001 has been 1.03%, while it varies from 0.71% in Mandya district to a maximum of 1.22% in Ramanagaram district.

In 7 districts namely Shimoga, Kolar, Bangalore (Rural), Chikkaballapura, Chitradurga, Madhigiri and Mysore the density of number of small schools is in the range of 50 to 100 and constitutes 32% (499 schools). The combined average population growth in these 7 districts during 1991 – 2001 has been 1.38%, with the lowest in Madhugiri (1.18%) district and the highest in Mysore (1.5%) district.

The third category of districts with density of small schools in the range of 10 to 50 are seen 11 districts namely Belgaum, Davanagere, Chikkodi, Chamarajanagara, Bidar, Bangalore (South), Raichur, Bagalkot, Bangalore (North), Bijapur and Kodagu. The total number of small schools in these districts constitutes 197 (12%). The average annual population growth being 1.75%.

The last category of districts with density of less than 10 small schools are in the districts of Haveri, Koppal, Bellary, Dakshina Kannada, Udupi, Dharwad, Yadagiri, Gadag and Gulbarga. In these districts the total number of small schools is 47 (3%).

The medium of instructions in these 1584 schools is mainly Kannada (1358) followed by Urdu (212). There are few Marati schools (12) and Telugu schools (2).

The districtwise number of small schools as per the list provided by SSA and the average annual population growth during 1991 – 2001 is presented in Table-1.1 and Table-1.2 below:

Table – 1.1: Districtwise Number of Small Schools by Medium of Instruction						
District Name	Kannada	Urdu	Marati	Telugu	Total	%
HASSAN	151	20	0	0	171	10.8%
TUMKUR	148	23	0	0	171	10.8%
CHIKKAMAGALUR	137	9	0	0	146	9.2%
UTTARA KANNADA	135	9	0	0	144	9.1%
RAMANAGARA	93	16	0	0	109	6.9%
MANDYA	91	9	0	0	100	6.3%

5.2 Current Status

The current status of the 1584 small schools indicates that 1461 (92%) are working and 123 (8%) schools are closed. The closure of the schools is due to low enrolment of children which are merged with other schools in the neighbourhood. The districtwise current status in-terms of working and closed schools is presented in the following Table – 2.

Table - 2: Districtwise distribution of Current Status of Small Schools						
District	WORKING	%	CLOSED	%	Total	%

5.3 Medium of Instruction of Closed Schools

The medium of instruction of the closed schools shows that Kannada schools are more as compared to other types of schools. The districtwise number of schools closed based on the medium of instruction is given in Table – 3 below:

Table - 3: Districtwise Number of Closed Schools by Medium of Instruction					
District	Kannada	Urdu	Marati	Telugu	Total
CHIKKAMAGALUR	18	0	0	0	18

5.4 Number of Years since Schools are Closed

It is seen that most of the schools closed (113 out of 123) are in the last one year. The number of schools closed based on the medium of instruction reveals that most of the Kannada schools have been closed more than a year ago as compared to other medium schools which are closed in the last six months. The number of schools closed by year and medium of instruction is presented in Table – 4 below:

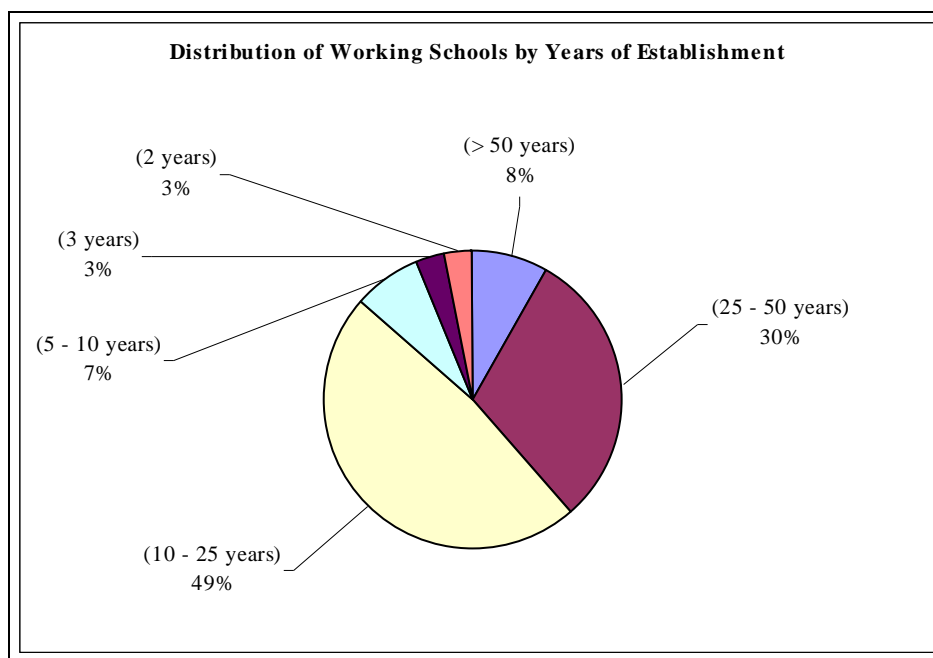

Table - 4: Districtwise Number of Closed schools by Medium of Instruction & Year of Closure							
Since when Closed	Number of Years since closed	Kannada	Urdu	Marati	Telugu	Total	%
10 YEARS	10.0	1	0	0	0	1	0.81%

Total		111	9	2	1	123	100.00%

The ownership of the infrastructure facilities of these closed schools are with the BEO of the respective blocks. In none of these closed schools teaching or non teaching activities are taking place.

5.4 Working Schools and Number of Years

The distribution of 1461 working schools by years of establishment is presented in the following graph. It is seen that 49% of these schools are 10 to 25 years old followed by 30% of the schools which are 25 to 50 years old. There are 8% of schools which are more than 50 years old and few of them are as old as a century. There are 6% schools which are as new as 2 to 3 years established across the state.

6. Access to Facilities

The access to institutional (GP, CRC, BRC and DDPI) and infrastructure facilities such as rooms, toilet, drinking water, electricity, compound wall, ramp and playing ground in the working schools are highlighted in this section.

6.1 Access to Institutional Facilities

The average distance from the small schools to different institutions is presented in the following graph.

The average distance to GP is about 4.5 kms from the school indicating that the small schools are located in other villages of the GP main village. It is seen that only 109 (8%) of the 1461 working schools are located in the GP head quarter villages which includes some of the schools located in the urban areas. The maximum distance of 50 kms is seen in Uttara Kannada district.

6.2 Availability of Infrastructure Facilities

6.2.1 Number of Rooms

The average number of rooms available in 1461 working schools is 2 and varies across schools in the range of 1 to 16. The maximum number is seen in GLPS Mirkhal, Bidar district, Basavkalyan Block, Beluru Cluster. The distribution of number of working schools with total number of rooms in the school is presented in Table – 5. As seen from the table, one third of the schools are single room schools, while nearly 45% of the schools have 2 rooms. There are few schools where the number of rooms available is more than 5. The number of rooms used for instructional purposes among the total available rooms is only one. This is obvious because of low enrolment of children. Also, in schools having more than 2 rooms, all rooms are not used for instructional purposes.

Table - 5: Distribution of Working Schools by Total Number of Rooms

Total No. Rooms	No. of working Schools	%
1	503	34.43%
2	656	44.90%
3	208	14.24%
4	72	4.93%
5	9	0.62%
6	4	0.27%
7	2	0.14%
8	2	0.14%
9	3	0.21%
10	1	0.07%
16	1	0.07%
Total	1461	100.00%

6.2.2 Facilities Available

Functioning toilet for children and electricity facility is available in more than 75% of the schools. However, availability of drinking water facility for children is seen in 54% of the schools only. The other three facilities – compound, ramp and play ground - are available in about 25% of the working schools only (Table – 6).

Table - 6: Percentage of Working Schools having facilities

Facilities	Number of Schools Available	%
Functioning toilets for children	1,123	76.87%
Drinking water facilities for children	792	54.21%
Electricity	1149	78.64%
Compound	350	23.96%
Ramp	350	23.96%
Playing Ground	417	28.54%

7. Teachers Profile

In this section the profile of teachers in the working schools in terms of social group and the annual growth rate of teachers during the period 2001–02 to 2009–10 are highlighted.

7.1 Number of Teachers

The trend in the number of teachers by gender in the 1461 working schools during the nine year period is presented in Table – 7 below. As seen from the table, there has been a declining trend during 2001 to 2006 and increases in the next two years and again declines in the last two years. This decline is more among the male teachers as compared to female teachers whose number is continuously increasing excepting in the year 2009 – 10. The percentage of female teachers over the nine years is continuously increasing from 36% to 43%. However there has been a fluctuation in the annual rate of increase.

Year	MALE		FEMALE		Total	
	No. of Teachers	% change over Previous Year	No. of Teachers	% change over Previous Year	No. of Teachers	% change over Previous Year
2001 - 02	1168		648		1816	
2002 - 03	1187	1.63%	666	2.78%	1853	2.04%
2003 - 04	1170	-1.43%	713	7.06%	1883	1.62%
2004 - 05	1169	-0.09%	739	3.65%	1908	1.33%
2005 - 06	1168	-0.09%	760	2.84%	1928	1.05%
2006 - 07	1168	0.00%	789	3.82%	1957	1.50%
2007 - 08	1149	-1.63%	857	8.62%	2006	2.50%
2008 - 09	1131	-1.57%	881	2.80%	2012	0.30%
2009 - 10	1135	0.35%	851	-3.41%	1986	-1.29%

7.2 Social Group of Teachers

The distribution of teachers based on the social group over the last nine years indicates similar pattern over the years. OBC & General category teachers are over 60% followed by SC and Muslim groups who are almost same (15%). The other two groups namely the ST and other Minority (mainly Christians) teachers constitute less than 5%. The relevant information is given in Table – 7 below.

Year	SC		ST		OBC & GENERAL		MUSLIM		OTHER MINORITY		Total	
	No. of Teachers	%	No. of Teachers	%	No. of Teachers	%	No. of Teachers	%	No. of Teachers	%	No. of Teachers	%
2001 - 02	265	14.59%	72	3.96%	1148	63.22%	255	14.04%	76	4.19%	1816	100.00%
2002 - 03	286	15.43%	75	4.05%	1160	62.60%	250	13.49%	82	4.43%	1853	100.00%
2003 - 04	296	15.72%	76	4.04%	1167	61.98%	254	13.49%	90	4.78%	1883	100.00%
2004 - 05	309	16.19%	75	3.93%	1170	61.32%	266	13.94%	88	4.61%	1908	100.00%
2005 - 06	300	15.56%	81	4.20%	1176	61.00%	275	14.26%	96	4.98%	1928	100.00%
2006 - 07	300	15.33%	86	4.39%	1197	61.17%	275	14.05%	99	5.06%	1957	100.00%
2007 - 08	307	15.30%	87	4.34%	1220	60.82%	288	14.36%	104	5.18%	2006	100.00%
2008 - 09	295	14.66%	92	4.57%	1242	61.73%	287	14.26%	96	4.77%	2012	100.00%
2009 - 10	296	14.90%	87	4.38%	1234	62.13%	283	14.25%	86	4.33%	1986	100.00%

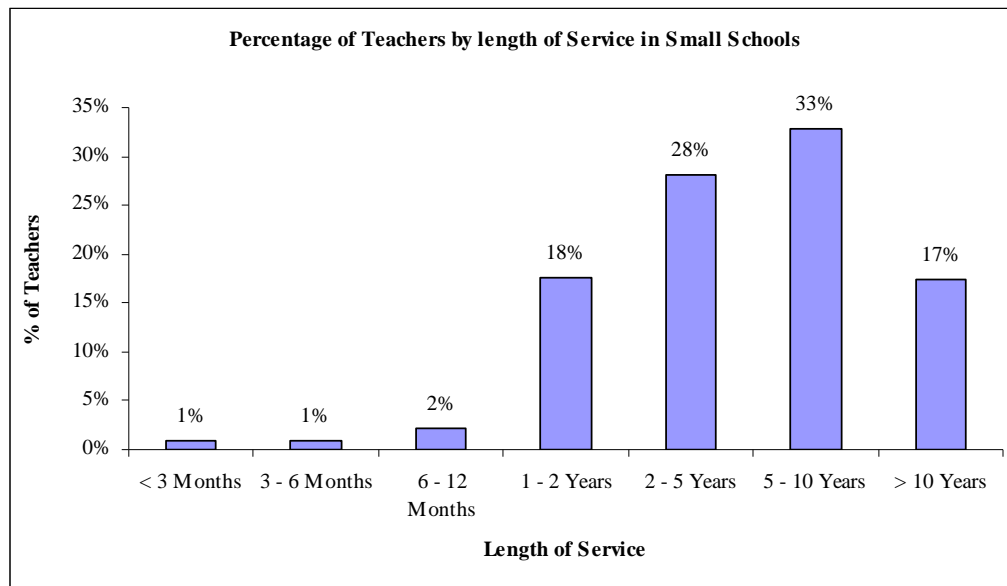

The annual change in the number of different social group of teachers is presented in Table-8 below. It is seen from the table that the trend in the

Year	SC		ST		OBC & GENERAL		MUSLIM		OTHER MINORITY		Total	
	No. of Teachers	% change over Previous Year	No. of Teachers	% change over Previous Year	No. of Teachers	% change over Previous Year	No. of Teachers	% change over Previous Year	No. of Teachers	% change over Previous Year	No. of Teachers	% change over Previous Year

2008 - 09	295	-3.91%	92	5.75%	1242	1.80%	287	-0.35%	96	-7.69%	2012	0.30%
2009 - 10	296	0.34%	87	-5.43%	1234	-0.64%	283	-1.39%	86	-10.42%	1986	-1.29%

7.3 Length of Service of Teachers

The distribution of teachers by length of service in the small schools is presented in the following graph. The average length of service of teachers in the small schools is about 6 years. The tenure of services of the teachers in the small schools indicates that 17% of the teachers are having over 10 years followed by 33% with 5 to 10 years. More than one fourth of the teachers are having 2 to 5 years tenure while less than one fifth are in the range of 1 to 2 years tenure. Less than 5% of the teachers are new to the small schools with less than a year of service.

The annual growth rate in the number of teachers in the working schools over the last nine years calculated based on the exponential trend ($y=a*b^t$, y =number of teachers, t = no. of years) indicates that the overall growth rate is 1%. The genderwise growth rate shows negative growth of male teachers as compared to over 3% among female teachers. Across the different social groups, the annual growth rate is higher among the ST teachers (2.12%) as compared to other groups of teachers. The relevant data is given in Table-9 below.

	Annual Growth Rate (%)
Male	-0.32%
Female	3.07%
SC	1.24%
ST	2.12%
OBC & GENERAL	0.81%
MUSLIM	1.16%
OTHER MINORITY	1.38%
Total	1.00%

8. Children Profile

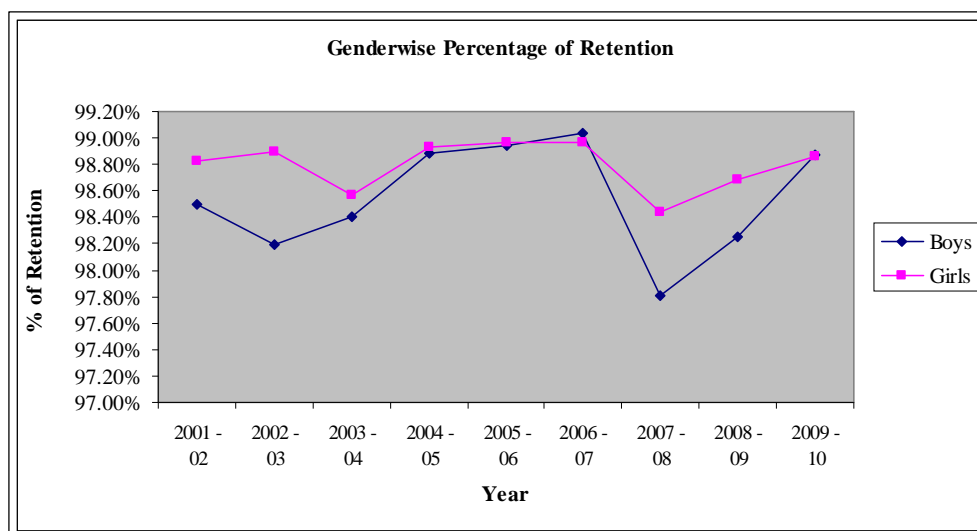

In this section the profile of children in the 1461 working schools based on the class, gender, social group and annual growth of enrolment and retention status are discussed.

8.1 Number of Children

The distribution of children by gender in the 1461 working schools over the last nine years is presented in Table – 10 below. As seen from the table, the gender distribution is almost similar over the years both in enrolment and retention. However, in absolute numbers, there is a declining trend in enrolment status over the period.

Year	Boys				Girls				TOTAL			
	Enrollment	%	Retention	%	Enrollment	%	Retention	%	Enrollment	%	Retention	%
2001 - 02	13174	50.82%	12976	50.74%	12748	49.18%	12598	49.26%	25922	100.00%	25574	100.00%
2002 - 03	12660	50.93%	12432	50.75%	12199	49.07%	12065	49.25%	24859	100.00%	24497	100.00%
2003 - 04	12388	51.13%	12191	51.09%	11840	48.87%	11670	48.91%	24228	100.00%	23861	100.00%
2004 - 05	11526	50.68%	11397	50.67%	11215	49.32%	11095	49.33%	22741	100.00%	22492	100.00%
2005 - 06	10753	50.83%	10639	50.82%	10402	49.17%	10295	49.18%	21155	100.00%	20934	100.00%
2006 - 07	9532	50.22%	9440	50.24%	9447	49.78%	9349	49.76%	18979	100.00%	18789	100.00%
2007 - 08	8656	49.81%	8466	49.65%	8723	50.19%	8587	50.35%	17379	100.00%	17053	100.00%
2008 - 09	7502	50.16%	7371	50.05%	7455	49.84%	7357	49.95%	14957	100.00%	14728	100.00%
2009 - 10	7637	49.62%	7551	49.62%	7754	50.38%	7666	50.38%	15391	100.00%	15217	100.00%

The retention rate between boys and girls over the period presented in the following graph, shows that retention of girls is marginally higher than boys.

The overall trend in the enrolment and retention of children in 1461 working schools indicates that over 5% annual decrease in both enrolment and retention rates. The annual percentage change shows a continuous declining of enrolment and retention with highest reduction seen during 2006 – 07 and 2008 – 09. The declining changes are more among the boys as compared to girls. However, there has been a positive change in the year 2009 – 10 as compared to 2008 – 09. The details are given in Table – 11 below.

Table - 11: Genderwise Annual Growth Rate of Children Enrolment and Retention

Year	Boys				Girls				Total			
	Enrollment	% change	Retention	%	Enrollment	%	Retention	% change	Enrollment	% change	Retention	% change
2001 - 02	13174		12976		12748		12598		25922		25574

The distribution of Children enrolment and retention status by social group presented in Table – 12 indicates that the number of children across the different social groups has declined over the years. However, percentage distribution shows that decline in OBC & General and Other Minority group of children, while it has increased among the SC and ST children.

The trend in the annual growth rate of children enrolment across the different social group reveals varying negative trends (Table-13). The highest decline of 11% annually is seen among the other minority children followed by 6% decline each among the OBC & General and Muslim children. Among the SC and ST children the enrolment rate is declining at 3% annually.

The annual change in the enrolment and retention status of children across the different classes between 2001 and 2010 is presented in Table – 14 below. It is seen from the table that the annual decline of over 6% among children in Class 4, followed by about 6% in Class 2 and less than 6% in Class 5. The lowest decline of 4.5% is noticed among the children of Class 1. During 2009 – 10, there has been an increase of Class 1 and Class 5 children as compared to decline in Classes 2, 3 & 4.

9. Feasibility of Continuance or Closure of Schools

Based on the list of small schools provided by SSA and information collected from these schools feasibility of continuing or closing/merging of schools is discussed in this section. The rationale for this is arrived considering the current enrolment status (2009 – 10), trend in enrolment (2001-2010) and the potential children available in the villages (based on number of children going to anganwadi centres where ever available) for enrolment to schools in the year 2010 – 11 and further for about two years later. Also, the community perception and teacher perception are considered for assessment of continuing or closing/merging of the schools. The details of individual schools to be continued or closed/merged are given in the annex.

As per SSA, small school is defined as school with an enrolment of 5 to 10 children. It is to be noted here that the 1585 list of small schools with enrolment details provided by SSA is based on the EMIS data pertaining to the year 2008 – 09. However, during the visit to the schools difference between the EMIS data and the actual situation for 2009 – 10 is observed. The study team visited all these schools and the requisite information has been collected from different sources (teachers, community, GP and Anganwadi). Based on the information collected from these sources, it is observed that 123 schools are already closed and merged with the neighbouring schools due to low enrolment. Hence, the study focused on the feasibility of continuing or closing/merging of 1461 working schools.

9.1 Continuance / Closure of schools

As already seen, the trend in the children enrolment in 1461 working schools is declining at 5.6% annually between 2001 and 2010, while the average number of children per school has declined from 18 to 11. But, the enrolment of children in Classes 1 to 5 during 2009 – 10 in these schools is varying from as low as 1 to as high as 367. If Class 5 is excluded, then the children available for the 2010 – 11 enrolment will vary from 0 to 295. Also, it is essential to consider the number of children going to Anganwadi, who are the potential children for enrolment to these schools. Thus in the following Table – 15 an analyses is presented giving three scenario's of distribution of 1461 working schools.

Enrolment during 2009 - 10	Class 1 to 5		Class 1 to 4		Class 1 to 4 + Anganwadi Children	
	No. of Schoolss	%	No. of Schoolss	%	No. of Schoolss	%
0	3	0.21%	5	0.34%	3	0.21%
up to 5	128	8.76%	318	21.77%	111	7.60%
6 to 10	883	60.44%	865	59.21%	375	25.67%
11 to 15	344	23.55%	191	13.07%	292	19.99%
16 to 25	65	4.45%	59	4.04%	471	32.24%
>25	38	2.60%	23	1.57%	209	14.31%
Total	1461	100.00%	1461	100.00%	1461	100.00%

As seen from Table - 15, in nearly 70% of the schools the enrolment of children from Class 1 to 5 during 2009 – 10 is 10 children or less. If we remove Class 5 enrolment during 2009 – 10 (as children of 5th standard will move to HPS category schools) the percentage of schools with 10 children or less will increase to 81%. As explained earlier, by considering the potential children available in the villages (based on the children enrolled in the Anganwadi centres where ever available & in places anganwadi centre is not available, the number of children in the age group of 3 to 5 years is based on the teacher and community estimation), it is seen that schools with less than 10 children for enrolment for the year 2010 - 11 will be reduced to 33%. This means that the immediate concern is to focus on these on these 33% (489) schools for feasibility of continuing / closure rather than on the remaining 972 schools where the enrolment is not an issue.

The districtwise distribution of these 489 schools with up to 10 enrolments is presented in Table-15A. As seen from the table, 92% of these schools are concentrated in 15 districts.

District	No. of Schools	%	District	No. of Schools	%
HASSAN	73	15%	CHAMARAJA NAGARA	7	1%
RAMANAGARA	49	10%	CHIKKODI	7	1%

BELGAUM	14	3%	YADAGIRI	1	0.2%
DAVANAGERE	12	2%	Total	489	

9.2 Type of Schools for Continuance / Closure

The medium of instruction of the 489 schools that needs immediate concern for closure / merger reveals that Kannada schools constitutes 64%, Urdu schools 35% and 1% Marati schools. However, an analysis of the schools by different medium of instructions shows that 25% of the Kannada schools and 85% of the Urdu schools needs to be closed because enrolment is less than 10. The high percentage of urdu schools is due to the fact that the number of muslim children going to anaganwadi centres is not available. This needs to be considered while making alternate arrangements for children in urdu schools. The detail of the distribution of schools by medium of instruction is given in Table – 16.

Medium of Instruction	Up to 10 enrolment			> 10 enrolment			Total
	No.	% within	% across	No.	% within	% across	
Kannada	312	25.02%	63.80%	935	74.98%	96.19%	1247
Urdu	173	85.22%	35.38%	30	14.78%	3.09%	203
Marati	4	40.00%	0.82%	6	60.00%	0.62%	10
Telugu	0	0.00%	0.00%	1	100.00%	0.10%	1
Total	489	33.47%	100.00%	972	66.53%	100.00%	1461

The detailed enrolment under three scenarios in Kannada and Urdu schools is presented in Table – 17 and Table – 18 below.

Table - 17: Distribution of Kannada Working Schools based on Enrolment during 2009 - 10

Enrolment during 2009 - 10	Class 1 to 5		Class 1 to 4		Class 1 to 4 and Anganwadi Children	
	No. of Schools	%	No. of Schools	%	No. of Schools	%
0	2	0.16%	3	0.24%	1	0.08%
up to 5	111	8.90%	276	22.13%	71	5.69%

9.3 Neighbourhood Schools

The details of the neighbourhood schools from the 1461 working schools pertaining to number of schools, average distance, type of schools and approximate number of children going to the neighbourhood schools for 1 to 5th standard is presented in Table – 19 below.

As seen from the table, in 68% of the villages, children are going to neighbourhood schools for 1 to 5th standard. This is more among the urdu medium schools as compared to Kannada medium schools.

All the three types of school management are seen in the neighbourhood. The number of government and private schools available in the neighbourhood in almost same ie., for every one government LPS small school there is one government and one private school in the neighbourhood. Where as the number of aided schools in the neighbourhood is less.

Access to the neighbourhood schools indicates that the average distance between the small school studied and the neighbourhood school is about 5 kms. This is more for the private schools (8 kms) as compared to government schools (3 kms) and aided schools (5 kms)

The type of neighbourhood schools to which children are attending reveals that 1323 (60%) schools are of HPS category followed by 501 (23%) LPS and 386 (17%) Composite High Schools.

On an average 8 children are going to the neighbourhood schools from the villages where small schools are located.

Table - 19: Details of Neighbourhood Schools

9.3 Networking of Schools

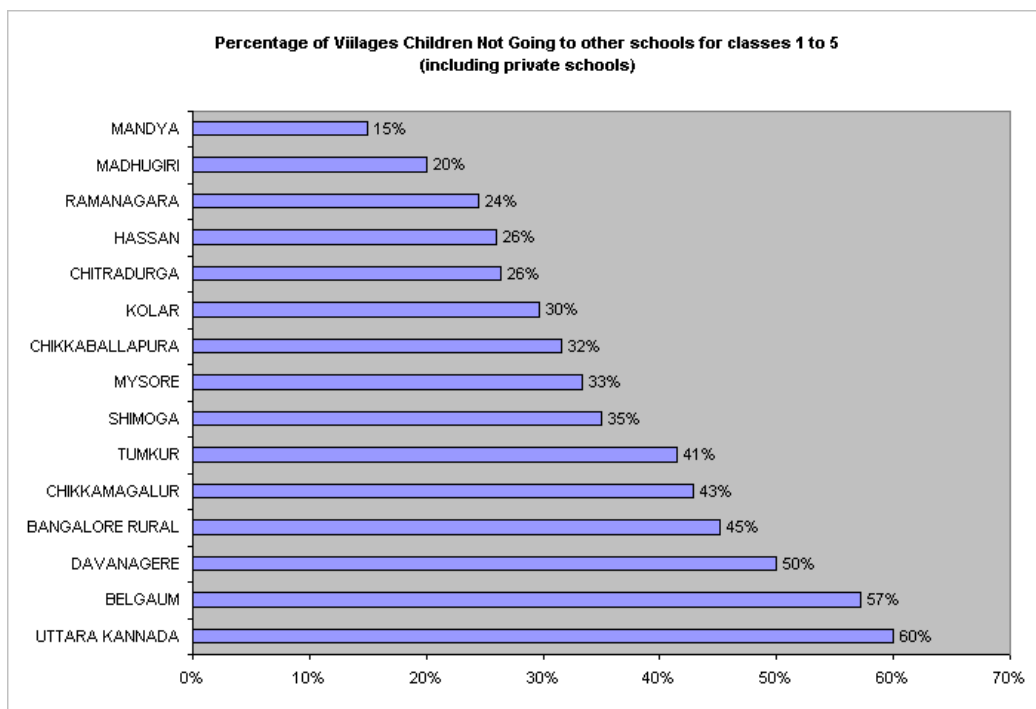

In order to make networking with the neighbourhood schools, availability of road and transport facilities is important. It is seen that good pucca road facilities is available to 49% of the villages, while in the remaining villages access roads are not in good condition.

Transport facility is available in 58% of the villages, while in 42% of the villages any form of transport facilities is not available.

It is also seen that private schools in the neighbourhood are having their own transport facility for picking up children from the villages and dropping them back.

As seen in Table-15A, 489 schools across the districts will have children with an enrolment of less than 10 indicating that in 489 village's enrolment is an issue. Also, it is seen that children from 34% (166) of these 489 villages are not accessing to the neighbourhood school facilities. The main reason for this is non availability of children in the villages going to higher standards. This reveals that closure or merger of the schools in these 166 villages may lead to children getting dropped out from the schools. The districtwise percentage of villages where children are not going to other schools for primary level is presented in the following graph.

10. Teacher and Community Perception

In this section the perception of teachers and community in the 1461 working schools for low and declining enrolment are discussed.

10.1 Teachers Perception for Low/Declining Enrolment

The two most important reasons for low / declining enrolment of children in the schools are less population leading to lesser number of children in the LPS level and due to opening of private schools in the nearby areas. The third reason is due to migration of families resulting in low/declining enrolment. The migration is of long duration to cities (mainly to Bangalore, Goa, Hyderabad) and short duration to irrigated areas, coffee estates, areca nut harvesting and other non agricultural labour in nearby towns.

The distribution of various perceptions of the teachers in Kannada and Urdu schools for low/declining enrolment is given in Table – 20 below.

Reasons for Low / Declining Enrolment	Kannada Schools		Urdu Schools	
	No. of Responses	%	No. of Responses	%
LESS POPULATION	1749	88.07%	223	78.80%
DUE TO PRIVATE SCHOOLS	626	31.52%	93	32.86%
MIGRATION OF FAMILIES	308	15.51%	79	27.92%
NO BASIC FACILITIES	123	6.19%	23	8.13%
NO TRANSPORT FACILITY	115	5.79%	8	2.83%
POVERTY	101	5.09%	16	5.65%
SHORTAGE OF TEACHERS	82	4.13%	14	4.95%
DUE TO HPS SCHOOLS	38	1.91%	15	5.30%
FOREST AREA	18	0.91%	1	0.35%
MARATI	11	0.55%		0.00%
URDU	7	0.35%	62	21.91%
HILLY AREA	3	0.15%		0.00%
NO ANGANAWADI	3	0.15%	1	0.35%
TAMIL	2	0.10%		0.00%
TELUGU	2	0.10%		0.00%

10.2 Teachers Suggestions for improving Enrolment

The suggestions made by teachers for improving the enrolment in the small schools are:

- introduction of English language so that it will reduce children going to convent schools where English is the medium of instruction;
- providing all basic facilities that makes the small schools look like private schools to attract the parents and children;
- to track anganwadi children for enrolment in government schools only;
- creating awareness among the community about the benefits from government schools;
- increase the class from 5th to 7th in villages where sufficient number of children are going for HPS in the neighbourhood schools so that higher standards are available in the village school itself rather than going outside;
- providing transport facilities to the neighbouring village children who are going to outside schools;
- increasing the number of teachers so that in case of meetings to be attended by teachers, there will be alternate teacher to run the school;
- opening of anaganwadi for urdu children will improve the enrolment in urdu schools;
- teaching method has to be improved and attractive like that of convent schools;
- stopping children who are migrating with the family by making arrangements for residential schools;

10.3 Community Perception for Low/Declining Enrolment

The three most important reasons that the community feels for low and declining enrolment in their schools are:

- adoption of family planning leading to lesser children in villages;
- because of less children in the families, access to private schools has increased by middle and higher income families;
- long term and short term migration of labour households has affected the enrolment status in the schools;

10.4 Community Perception for improving Enrolment

Community feels that the enrolment in their schools could be improved through the following measures:

- not giving permission to start private schools;
- introducing English subject in the schools;
- improving the basic facilities in the school;
- providing good and committed teachers;
- improving the quality of mid day meals;
- increasing the class up to 7th standard so that girls will continue in the same place rather than dropping out from the school;

10.5 Community Feedback on Closure of schools

Out of the 1461 working schools, community in 1364 (93%) villages unequivocally expressed for non closure of the schools. They have expressed various reasons for continuing the schools. The most common reasons expressed across all the regions are:

- problem of transport facility;
- problem of medium of instruction in other schools (for non kannada children- mainly urdu & marati medium schools);
- non-affordability for sending to private schools;
- accessibility in forest areas;

The community are apprehensive about the transport facility provision by the government. They express that even if the government provides transport facility, they want school in their villages. This is because of security of small children and girl students and also the sentimental attachment of having a school in their villages.

11. Suggestions for Continuance / Closure

Based on the analyses of the data presented in the previous sections, the feasibility of continuance / closure is highlighted below:

11.1 Closed Schools

It is observed that 123 schools are already closed and merged with nearby schools. The list is given in **Annex-4**.

11.2 Continuance of schools

As seen from the information collected from the 1461 working schools, it is suggested that 972 schools could be continued for a minimum of three years. This is according to the current enrolment status and the potential children available for the next three years. The list of 972 schools with details of enrolment and reason for continuance is given in **Annex-5**.

11.3 Closure / merger of schools

It is seen in section 9.3 (networking of schools) above, out of the 489 schools with enrolment up to 10 children, in 166 of these villages children are not going to neighbouring schools for primary level. These 166 schools can not be closed or merged with neighbourhood schools. If done then the children drop out could be anticipated. Thus the current focus of merger is to be envisaged for 323 schools only. However in case of urdu and marati schools, alternate strategies have to be adopted such as combining with the kannada schools with urdu / marati sections or continuing for one more year so that children may not drop out. The list of 166 schools with up to 10 enrolment and not going to neighbourhood schools for primary level is given in **Annex-6** and the list of 323 schools that needs top priority for merger is given in **Annex-7**.

11.4 Other Suggestions

In order to create a working environment in small schools, the following aspects could be considered:

- incentives could be provided to motivate the teachers to attend regularly in the small schools which are located in difficult terrains;
- non teaching activities of the teachers need to be reduced (such as involvement in census, voter list verification, election duty, pulse polio programme etc.) so that they can focus on teaching and reduce away from school;
- involvement of corporate sectors as partners would help in creating better infrastructure, enabling teaching environment and improvement in enrolment status.

Annex – 1
(Terms of Reference)

TERMS of REFERENCE for a STUDY of
SMALL SCHOOLS in KARNATAKA.

[A] Context : The Governing Council of SSA at its meeting held on 04.02.2009 desired a study of all schools with an enrolment of 6 to 10 children in 1 to 5 standards, by an independent agency. Such a desire was expressed during a discussion of the need to merge small schools with nearby medium and large schools in the interests of viability and feasibility of management, economy of scale of operations and meaningful schooling for children.

A draft of the Terms of Reference (ToR) for the agency for such a study was to be prepared by the REMS unit of SSA. It is noted that there were 1218 schools with 6 to 10 enrolments in the State [2007-08]. This figure increased to 1585 schools, by 2008-09; an increase of 360 schools.

[B] Objectives of the Study :-

Objectives are stated with the following assumptions

- There is no common history, social dynamics, and common rationality for the present small school status as well as for future prospects. Each school is distinct and unique in its functioning. Every school is a case by itself.
- It is difficult to adopt a uniform / mechanical policy of closure of 6 to 10 small schools. Every school may have to be considered case-by-case on merits.
- Stability of habitations / community in neighbourhood, access to private schools in neighbourhood, migratory profiles, pattern of enrolments across 1 to 5 standards during 2001-02 to 2008-09 and possibilities for relocation of children of the school, under consideration for closure may be significant parameters for the ToR of the study.
- Sample survey needs to be eschewed. Every school needs to be studied. Common profiles may be possible at the time of analysis.
- Medium of Instruction in the school and language at home in the neighbourhood [community that feeds children to school] is a significant factor.

Objectives :-

- a) To examine briefly the genesis, evolution, and community context of small schools ;
- b) To examine the shifts in enrolments and retention matrix in the last 9 years, 2001-02 to 2009-10, with special reference to sex, social class and neighbourhood networks of access to LPS and HPS schooling, and develop case profiles therein ;
- c) To examine the physical infrastructure facilities and human resources available in small schools and develop a typology of schools on the basis of such facilities ;
- d) To interact with local communities and explore reasons for declining enrolments.
- e) To develop a typology of small schools on the basis of justifications for continuation or closure.
- f) To explore alternative support systems for children of every small school / community which may apparently face the prospects of closure.

Methodology:-

Case study and Documentary Analysis Techniques may be adopted. There is no need for sampling.

All 1585 schools may be covered. Interview techniques / FGD may be adopted for objective (d)

Plan of Analysis :-

- a) Case study profiles
- b) Flow Trends of children
- c) Descriptive Analysis for objective (d)

Report :-

Case study profiles need not be part of the report. They may be submitted as supportive documents. Analysis, Flow Matrix, Typology of continuation / closure need to be part of the report. Prospects for future of children / communities facing closure may be included in the report.

Block / District-wise List of Schools facing :-

closure may be given in a chart along with justifications in brief and prospects for future, as already discussed in detail in the report. Study needs to be completed in 4 months.

Time Frame: The study needs to be completed in 4 months from the date of MOU.
