#### FOREWORD

In a country of the size, diversity and complexity of India any planning strategy or methodology would be meaningful only if the regional special factors are consciously woven therein. Especially in the area of education, it is essential to go to the lowest level of planning, because it is only through this, that the social, economic and other needs can be assessed and relevant solutions be sought.

An opportunity for assessing the problems that impede educational achievements & identifying strategies for them has emerged into the District Primary Education Programme.

Attempts will be made to meet the districts mounting challenges and unfinished tasks of primary education through this plan. The local community has been taken into confidence in the preparation of this plan.

The activities proposed under this plan, spread over a period of 5 years, are the result of large scale detailed discussion with the community, teachers & administrators. Efforts have been made to cover every aspect so as to achieve the target not only of expanding educational facilities to reach every child, but also that of retaining him/her in the school and imparting quality education.

We hope to see a positive improvement in the educational scenario of the district after the completion of the tasks being proposed herein.

(SHAHZAD KHAN) I.A.S. Collector and Mission Coordinator District Bhind

## ACKNOWLEDGMENTS-

It is a proud privilege for me to record my deep sense of gratitude and indebtedness to the Govt. of Madhya Pradesh for the inclusion of this District in the District Primary Education Programme, an opportunity which the district was eagerly waiting for.

I am sincerely grateful to Mrs. Amita Sharma, I.A.S., Mission Director, Rajiv Gandhi Shiksha Mission, Bhopal, M.P., for the personal care, superb guidance and excellent supervision.

I convey my sincere thanks to all the honourable members of the Village Education Committees, Janpad Panchayats, Zila Panchayat and the District Planning Group for taking keen interest and extending whole hearted co-operation at every stage of the formulation of the plan.

I am gratefully obliged to Messrs R.S.Mishra, A.R. Birgaiyan, Dr. P.K. Chauhan, Ashok Sharma, Mahesh Jain and K.G.Sharma for their unquestionable sincerity and dedication in formulating the plan.

I wish to thank the whole department of Education, Bhind for extending unconditional support without which the completion of this task would have been difficult."

## CHAPTER - I

## DISTRICT PROFILE

#### 1.1 LOCATION :

Bhind, christened after the rishi - Bhindi stands in the extreme northern part of the state of . Madhya Pradesh with a total area of 4459 sq. kms. The boundaries of Bhind come shoulder to shoulder with those of Jalon (U.P.) in east and Morena (M.P.) in west. In north the boundaries of Bhind mingle with those of Agra and Etawah (U.P.) and fraternize with districts Gwalior and Datia in south. As a revenue district, it is a part of the Chambal Division, whereas in the field of education it still remains a part of the Gwalior Division. The distance from the divisional headquarters Morena and Gwalior being 100 and 80 Km. respectively.

Three perennial rivers the Chambal, the Sindh and the Kwari which flow through the district forming deep ravines by their sides. The forest area of the district is very low and constitutes 1.9% of the total area.

#### 1.2 DEMOGRAPHIC CHARACTERISTICS :

#### **Population**:

The total population of the district as per the 1991 census is 12.19 lakhs and the decidal growth rate of population is 25.17%. The details of the population are given below :

Table 1 1

			1								I adic I	.1
Block		SC			ST			General		1	Total	
	M	F	Т	M	F	T	M.	F	Т	M	F	T

Block-wise/Category-wise Population (1991 census)

From the table it is evident that Bhind Block has the maximum population and Raun Block has the minimum population.

The district has a sizeable SC population of 2.6 lakhs which is 21.3% of the district population. The SC are fairly well spread over all blocks. The ST population is very low and is 0.27% of the district population.

Blocks		Rinal		Urban			
·	Male	Female	Total	Male	Female	Total	
Ater	97966	81666	179632	•	•	-	
Bhind	88144	73362	161506	69168	57607	126775	
Gohad	99540	77034	176574	25072	20131	45203	
Lahar	79354	64423	143777	20389	16890	37279	
Mehgaon	116335	94235	210570	16198	13401	29599	
Raun	52553	43245	95798	6628	5659	12287	
District	533892	433965	967857	137455	113688	251143	

Block-wise Rural & Urban population (1991 census)

From the district population figures, it works out that 79.4% of the population live in rural areas.

#### Sex Ratio :

The sex ratio is an important indicator of the status of women in the district. The sex ratio of SC category and over all population is given below :

e Sex Ratio

		Table 1.3
Year	SC	Over all
1971	843	834
1981	- 812	824
1991	. 796	816

From the above table it is evident that the sex ratio of SC category and also of over all population is decreasing. It is alarming in the SC category.

	Table 1
Blocks	Year (1991)
Ater	834
Bhind	832
Gohad	774
Lahar	812
Mehgaon	810
Raun	823
District	816

Block-wise sex ratio

Among the blocks Gohad, Lahar and Mehgaon have sex ratio lower than district average. Gohad Block especially has a very poor sex ratio of 774.

#### **1.3 SOCIO ECONOMIC PROFILE :**

For educational interventions the socio economic conditions of the district are to be viewed very carefully. Some socio-economic features of the district are listed below :

- Majority of the families live in rural areas & below the poverty line.
- Due to inadequate irrigational facilities the yield is poor resulting in poor economic conditions.
- There exists feudal set up and pre-dominance of upper castes.
- A large number of persons are in military & police forces as a result the children are looked after by their mothers and very often neglected due to pressing agricultural work.
- Due to slow urbanisation and absence of major towns & trade centres the employment opportunities are few. As a result, there is large scale migration of agricultural & unskilled laboures.
- The status of women-both socially is low due to prevailing social orthodoxies & male dominance.

The purdah system is strictly followed by women, especially in lower castes. The role of women in economic activities is marginal. They are seen more as objects for sustaining the men in their food & pleassure & as a medium of continuance of the family.

The poor reproductive health of rural women results in high infant mortality rate. There is a higher mortality rate of girls due to discrimination in nutrition, access to health care and more burden of household work during their childhood.

The families living in Chambal, Sindhu & Kwari ravines do not find it safe to send their children to school without escorts, who generally are not available.

#### Interrelation between socio-conomic quality of life & education.

The poverty in the society both in rural & urban areas, poor health of females, docoity in Chambal revines, feudal setup & migration adversely affect the education of the children, especially of the girls. The SC families do not send their young girls to school, due to fear of caste discrimination. In addition, non availability of the educational facilities are responsible for poor literacy of the district.

#### 1.4 PHYSICAL INFRASTRUCTURE :

#### Roads

The total road length of 1392 kms covers the district having an area of 4459 sq. kms. Out of these 1232 kms. is pucca road and the rest is kutcha: 39 out of 891 villages are still not accessible. The condition becomes worst in rainy seasons, resulting in standstill of transport services. No national highway passes through the district the two main roads in the district are Gwalior-Etawah & Gwalior-Jalon.

#### Electricity

In the area of electrification, the district has made real progress. Nearly all the villages except one precentage have electricity.

c: plan97 bhind bhind doc (7)

#### **Drinking Water**

The drinking water facilities are available in all villages. 695 villages have handpumps and 128 have tap water supply. 648 villages however face problem, especially during summer season, when water level goes down. Also many of the handpumps become non-functional during summer season.

#### Health facilities

The health facilities are fairly well spread over the blocks and render their services. However, their is shortage of doctors and other medical functionaries. The shortage of medicines is a common phenomenon. Following table shows status of health facilities :

#### Health facilities

Private	381
NFE Centres	407
ICDS Blocks	5
Anganwadis	1002
TLC Blocks	6
OBB Scheme Blocks	6
Shikshak Samakhya Blocks	- 6

#### Literacy Rate

e-.

The status of literacy rates for the country, state & the district # as follows :

Literacy Rate

Table 1.7

		Overall			SC 5			ST		
	Male	Female	Total	Male	Female	Total	Male	Female	Total	
National	64.1	39.3	52.2		1	37.4	+		29.6	
State	58.42	28.85	44.2	.50.51	18.11	35.1.5	32.16	10.73	21.5	
District	52.79	22.24	39.06	44.8	. 11.3	30.0	34+2.	-1056	23.6	

The above figures indicate that the literacy of the district is far below the literacy rate of state. The SC and female literacy rates are very low and alarming.

The blockwise literacy status is given in the following table.

Blocks	Over all	Male	Female
Atera	38.84%	53.31%	21.49%
Bhind	38.91%	52.27%	22.85%
Gohad	32.95%	47:54%	14.17%
Lahan	34.47%	49.16%	16.37%
Mehghon	-36. <b>23%</b>	51.41%	17.51%
Raun	34.61%	47.65%	18.76%
District	39.06%	52.79%	22.24%

(Table 1.8)

#### Blockwise Literacy Rate (1991)

The above table shows that Goldad block has lowest literacy rate (32.96), and the female literacy rate (14.17). The other three blocks where female literacy is less then 20% are Lahar, Mehgaon, Gohad & Raun.

The literacy rate of the district is 39.06. This clearly indicates that 60% of population have not undergone formal education. The poor educational facilities coupled with socio-economic status are the causes for poor literacy in the community. This indicates that there is a need of an educational programme which may focus on primary education of the children.

The government efforts & resources alone are not adequate in reaching out to the educational needs of all children. To supplement these efforts, the District Primary Education Programme (DPEP) would be a significant intervention.

## **CHAPTER - II**

#### TASK AHEAD - UNIVERSALISING PRIMARY EDUCATION

#### \$2.1 Policy frame work :

The National Policy on Education 1986 up dated in 1992 reaffirms the national commitment to Universalisation of Elementary Education (UPE). The NPE stresses on free and compulsory education of satisfactory quality to all children in 6-14 year of age.

In view of the current levels of education at the elementary stage, there is an urgent need of Universalisation of Primary Education (UPE). In the first instance UPE requires that.

- 1. All children in the age group of 6-11 years attend school within a radius of one km.
- 2. They stay at school for five years and complete primary schooling.
- 3. They achieve minimum levels of learning.

To achieve the objectives of UPE, it is necessary to accertain the existing educational facilities, identify the weaknesses in the system and specify actual needs. To identify the key educational problems and seek possible solutions to them, a two fold methodology has been adopted - one through Microplanning and second - through Baseline Studies carried out in the field of Social Assessment & Learners Achievement.

## 2.2 Micro Planning :

The strategy adopted for participatory microplanning is being designated as 'Lok-Sampark Abhiyan' (LSA).

The LSA is a village level house to house survey & aims at

assessing the current educational resource facilities.

assessing the total number of children in the age group 5-14 years age group & their current educational status.

assessing the literacy status of the adult members of the family

assessing non educational resources that may have a bearing on education such as drinking water, approach etc.

In order to accomplish the task of LSA detailed formats were prepared and Resource Persons trained : 04 at the state, 28 at the distt, 84 at the block level. The LSA was also an instument for social mobilisation to ellicit community participation in this microplanning. Since the panchayat constituted the grassroot structures of democracy & have a popular participative character, therefore, as a precursor to microplanning, 06 Block and \$43 village panchayat conventions were held. 1195 village level animator groups 'Prerak Samooh' to assist the teachers were constituted & trained in microplanning.

The teacher had a key role in microplanning. Informal dialogues & discussions at the village level were held. The childwise, fanilywise survey was done. PRA techniques were used for survey & recording survey outcomes, School Mapping exercise was done & Village Education Register (VER) was made. This yielded significant perception & insight into the educational needs & aspirations of the community. Village level surveys & discussions led to the formulation of village level plans endorsed by the Gram Panchayat.

These were then compiled at the Block & the District level. A computerised programme helped in this compilation & in the analysis of needs & required inputs.

(Source of information-LSA)

It is evident from the information given in tables 1,2, and 3 that there are considerable problems in terms of school facilities, non educational facilities. The issues affecting the question of education that emerged through discussions with the local community are broadly issues that emerged from Lok Sampark Abhiyan, which are given below :

1.	School Building	•	There is a shortage of school building particulary in remote rural areas.
•		•	Some of the school buildings in urban areas are in depleted condition and they
			are beyond repairs.
		•	Some of school building need repairs.
		•	The school which have large enrolment need aditional rooms.
		•	Drinking water facilities are not available in the schools.
		•	Toilet facilities specially for girls are not available.
		+	The enrolment of girls is very poor and it is more so in the backward classes.
		•	Some of the parents do not send their children to schools because the children
			Thelp the families in their door to door work.
		•	Some girls look after their younger brothers and sisters.

		-		
			•	At some places the schools are situated at a great destance and the girls find difficult to join the schools.
ł		*	•	In some of the schools, there is a shortage of teachers and hence not much
·	-			teaching in the schools therefore the parents do not send there wards to school.
	ł	э.,	•	The female teachers are not in the schools and therefore the parents do not send
			ļ	the grown up girls.
			•	The poor quality of teaching is one of the causes of drop outs.
			•	Irregular attendance of the children results in poor learning and the children
				ultimately dropout.
			•	Life ignorance of the parents regarding the value of the education is a major
	I			cause of the por enrolment of the children.
	I		•	There are many schools which are reparated from the village by nala or
Ì				riverlets and children during rainy reason can not go to school.
ł	2.	Teachers	*	Some of the schools are single teacher schools and his absense from the
			-	schools resulfs in to clorer of the school.
ļ			+	In many schools in urban are additional teachers are required because of the
				_high cnrolment.
			*	Create an environment which enable woman and girls for demanding
				education for themselves.
		_ ·	•	To facilitate girls access and completion of primary stage of schools.
ļ			•	Creation of mahila group of academics and activists rests, social workers gender
				experts and teachers for invironment building massive girls enrolment drives
				through mobilisation compaign.
	-		•	Strengthing of holding women in panchayat womens of is hardlyany money,
			-	available with the teacher for developing teaching aids.
	4.	Social Economic	•	Majority of rural families live below the poverty line:
		Factors	ļ	
			•	They are unable to meet the cost of the books and unifarms for their children.
			•	A large number of the persons are in the military and police force. The children .
			l	are looked after by the in mothers and very often they are neglected because of
				the pressing the agricultural work.
			•	The families living in Chambal Sindh and Kwari revines do not find it_safed_ to
				send their children in the schools alone.
	•	•		

c:\piam97\phind\bhind.doc (7)

*			The teachers belonging to the same village often keepbusy in their personel work and do not devote more time in the schools. On the other hands the teachers coming from the distant areas come late and leave earlier as per non availability of the buses.
		•	The teachers are not motivated for their jobs.
		•	Residential facility for the lady teachers are not available.
5.	Lack of facilities	•	There is shortge of tatpatti practically in all the schools.
			Furniture for the teachers is not sufficient.
		•	School contingency is only Rs 100 per year which is insafficient.
		•	The children can hardly be escourted daily to the schools.

The issues highlighted through the LSA have also been thrown up by the independent social assessment studies undertaken by ORG. The major finding of ORG's study & suggested course of action are as below :

-	*	Out of school - 16% Girls - 21% OBC/SC - 20% In 50% villages nvironment building exercise still continuing.
-	*	OBC/SC - 20%
	*	· · · · · · · · · · · · · · · · · · ·
	*	In 50% villages nvironment building exercise still continuing.
	1	
	*	Govt. school pereived to be of poor quality.
	÷	'Major problem of accessibility for child because of the absence of girls schools.
	•	53% school have pueen building out of which 39% were in unusable condition.
	•	Middle school in 24% of villages.
	•	Almost all the schools are co-educational.
	*	NFE was only present in 22% villages.

		<b>5</b> 7. •
		Nearly 3/4 of the schools having not more than two classrooms for five
		sections.
		Only 9 percent of schools had toilets.
2.	Teachers	Majority of the school have been than 2 teachers per school
		* 23 percent female teachers.
-		* 15 percent teachers are not trained.
		Concentrationof female teachers in urban areas.
		<ul> <li>Large difference between rural and urban student teacher ratio.</li> </ul>
		A higher percentage of teachers belong to the same village.
		Low morale and motivation of teachers.
		Irregular attendance of children especially girl children.
3.	Learner	
		* Differential treatment towards girl and poor children.
		<ul> <li>Lower status of female in the society affects girl child's</li> <li>education.</li> </ul>
		Looking after sibling and household chores are the major activity for the girl child.
		for the girl child. Children are engaged in various activities in the morning and
		Parents as well as girl children are most comfortable with female teachers and separate school for girls.
4.	Social and Economic	
	Development	Majority of rural tamilues living below proverty line.
		Inadequate irrigation facilities.
		indequate agricuitural produce.
		Disparties in land holding.
		Poor connectivity and accessibility to villages.

	Slow Urbanisation and absence of major towns and the centres.
-	- Poor drinking water and electricity availability.
*	Large scale migration of agricultural and unskilled labourers.
*	-Lower status of females both social and economic.
•	Poor reproductive health of rural women.
~	High infant morality rate.
-	High infant morality rate.

## 2.3 Problems, Causes and Solutions :

-Taking into account the LSA & the ORG, the critical issues & possible solutions to be addressed in -DPEP for Bhind are summarised below :

SNo.	Problem	Causes	<b>_</b>	Solution

		12.	Migration of the families in search of job.	12.	Provide Ashram Schools. Non formal Educational programmes
		13.	After attaining age of menarcy, parents do not send girls to schools.	13.	Girls school should be opened and provision made for female teachers.
		14.	Lack of awareness of parents about incentives.	14.	Awareness programmes should be conducted that highlights on incentives provided to school children.
3.	Low Achieviement	1.	Irregular attendance of the children in the schools.	3.	Teachers should ensure regular attendance of children.
		2.	Unintresting teaching learning proces	2.	Focus on joyful teaching learning process in teacher training - Improving quality of books. - Provision of contingency for preparation of teaching aids.
		3.	No detention policy of the government.	3.	Stress on evaluation & remedial teaching for low achievers.
~		4.	Absence of teachers from the schools & classrooms.	4.	Panchayat to ensure attendance of teachers:

.

	5	5. Low motivation of the teachers.		Motivational teachers training.
+ +		Eess emphasis on written work.	6	A .ignments to students must be given &
				regularly checked.
	7	7. Poor academic supervision.		Local literate person & panchayat to be
				entrusted with the academic supervision.

## **CHAPTER III**

## GOALS AND TARGETS

#### 3.1 GOALS :

District primary education programme aims at maximising enrolment of children falling in the age group of 6-11 years, their retention in the schools till they complete their primary education and attainment of the prescribed minimum levels of learning. Minimising the disparities between gender and social groups. Under this programme the goals envisaged are as under : -

- 1. The GAR will be raised from 82% to 100% by 2000,
- 2. The GER will be raised from 80% to 120% by 2002,
- 3. The RR will go up from 70% to 89% by 2002, and
- 4. The GAMR will be raised by 25% from the present level of achievement.

The following table displays the goals of the entire project year wise .

#### Yearwise Projection of Goals

Category.	97-98	98-99	99-2000	2000-2001	2001-2002

Drop outs at the end of 6th year 20% of current drop outs 3.

# CHAPTER IV

# STRATEGIES OF DPEP

4. For achieving the targets identified under DPEP, an array of strategies have been ideveloped based on problems identified and their solutions during LSA and Baseline studies on Social Assessment and Learner Achievement levels.

#### 4.1 Strategies for Improving enrolment and retention :

District Bhind has 1441 habitations out of which 280 habitations do not have schools. Even at schools are available, due to low response of community these facilities are not availed off. Hence the strategies for improving access will be aimed at:

- \* Ensuring Community Participation.
- \* Improving access by providing educational infrastructural facilities.

#### 4.1.1. Community Mobilisation :

This is the most important strategy, particulary relevant for Bhind with its Predominant feudal patriarchal society, its strong gender bias significant presence of scheduled castes with its aggrarian economy that does not perceive the value of education.

The strategies for social mobilisaton will but

\* Convergence with Total literacy Campaign (TLC)

The TLC has just been initiated in Bhind. TLC aims at creating a positive environment for education, educating the adult non literates which has a positive impact on the demand for primary education.

- Mobilising Panchayats by holding Panchayat conventions and getting local nanch involved with local educational functioning.
- \* Organising compaigns, Jathas from time to time with specific messages like enrolment, bringing dropouts to school, girl child.
- Special attention to mobilising women and girls. Areawise focus will be on Gohad,
   Ater, Lahar and Mehgaon blocks.

#### 4.1.2 Improving access by providing suitable educational facilities : These will include

#### a) **New Primary Schools**

The block wise requirements of the school is as under:-

Sno.	Blocks	Nos. of Primary School
1.	Ater	17
2.	Bhind	11
3.	Gohad	35
4.	Lahar	10
5.	Mehgaon	08
6.	Raun	07
	Total	

#### **Requirement of Primary Schools**

Table 4.2

In 65 accessless habitations having population more than 300, 65 schools are proposed to be opened. The priority will be determined on the basis of SC population. Three primary schools for girls will be opened in Ater Block for which the demand has been made by the community. Space for running these schools will be provided by the community.

Shiksha Karmis will be appointed by Janpad panchayats. Furniture worth Rs. 5,000 & essential school material worth Rs. 10,000 will also be provided.

#### b) Alternative Schools :

For children of very remote habitations or belonging to migrant community or occupied in domestic and wage carning work, thus unable to participate in formal schools, special schooling facilities designated as Alternative Schools will be provided.

The Alternative Schools will essentially be a non-graded teaching learning system, flexibly designed allowing learners to learn at their own pace and to achieve desired competencies.

Two teachers, of which one is female will be appointed by local panchayats. An intensive 10 days training based on specially developed teaching learning material will be given to teachers. There will be one supervisor for 10 Alternative Schools.

Three Alternative School Projects will be taken up in Ater, Bhind, Gohad and Lahar blocks.

The village community will provide accomodation for Alternative School. Provision will be made for providing essential material required for runing of these schools.

#### c) Education Guarantee Schème (EGS) :

The Govt. of Madhya Pradesh has launched an innovative scheme of providing a school in each habitation where there is a demand from the public for enroling 40 children or more and in tribal areas 25 children. The accommodation will be provided by the community. The teacher will be appointed by the gram panchayat. The scheme in a summary form is at annexure.

The significances of Education Guarantee Scheme (EGS) is that it targets the most needy and most deprived sections of the population : those who live intermote or scattered habitations and have steadily been left out of the reach of basic educational aminities. Any strategy for UPE must address the children of these communities on priority.

hind bhind doc (7)

The major strengthes of EGS are :

Based on sommunity demand.

Community is the key actor is EGS which will ensure children's participation in schools.

Cost effective :

Does not multiply administrative overheads. Makes use of existing resource. Supplements them with community colloboration.

Compels time bound action :

The govt provides accomplete and educational facility within 90 days.

Ensure quality :

Uses the new improved teaching learning material and ensures teacher training and learner evaluation. It is estimated that 152 EGS centres will be opened.

## d) Primary School Buildings

At present, 181 School's have no building while 88 new primary schools have to be opened. Thus there is the need to construct the 269 school buildings.

# Primary School Buildings

			(12016 4.5)
Sno.	Blocks	School building	Number of school.
· <b>-</b>		required	buildings to be constructed
•	-		under DPEP
1.	Ater	60	37
2.	Bhind	49	30
3.	Gohad	73	45
4.	Lahar	27	18
5.	Mehgaon	45	28
6.	Raun	15	9
	Total	°69	167

(Table 4.3)

#### e) Additional Class Room :

At present there are a large number of schools which fall short of the accommodation due to-increased enrolment. In such primary schools additional rooms shall be constructed and one additional teacher will be provided. The Block wise requirment of additional class rooms is shown below.

#### **Additional Class Room**

(Table 4.4)

Sn.	Blocks	Need	Additional rooms to be constructed under DPEP
1	Ater	153	- 35 -
2	Bhind	204	31
3	Gohad	137	28
4	Lahar	135	30
5	Mehgaon	156	32
6	Raun	125	24
···· , ····	Total	910	180

Additional room will be constructed within first three years of the project plan.

# f) Repairs To School Buildings :

The existing condition of school buildings is far from satisfactory. A sizable number of school buildings numbering 605 need major repairs. The following table gives details of repairing work.

Sno.	Blocks	No.of Schools need repairing
1.	Ater	105
2.	Bhind	110
3.	Gohad	120
4.	Lahar	90
5.	Mchgaon	100
6.	Raun	80
	Total	. 605

(Table 4.5)

The repairs will be taken up with the help of local community and local resources. This will require special mot stational efforts.

#### 4.2 QUALITY IMPROVEMENT FOR IMPROVING ACHIEVEMENT.LEVELS :

• development of competency based curriculum.

• development of new teaching learning material.

• empowerment of teachers through appropriate training.

• creating a physical environment for learning.

All these academic interventions aim at making teaching learning a joyful process, motivating ~ children to stay in schools and minimising drop-outs.

#### 4.2.1 Teaching Learning Materials :

The need of a joyful, activity based and child friendly pedagogy, which also focusses on minimum levels of learning at the primary stage of education, has been a long felt need. Addressing the problem, the state suitably modified the National MLLs.

SCERT at the State level nodalises the development of curriculum and teaching learning materials. The strategy adapted by the SCERT teaching learning material has been one of field trialling, involving multiple packages developed by multiple agencies both Government and non Government. On the basis of the trial outcomes of multiple packages, teaching learning materials are developed for introducing on a general scale. The field trial strategy is being implemented on a selective scale; in a phased manner, over the years, whereby field trials of class I materials has been done in 96-97. An improved teaching learning package developed by SCERT for class I will be introduced in all the schools in 97-98.

This new material is a complete set of the Teaching Learning materials comprising of

Activity Kit<sup>-</sup> Text Books

Teachers Guide - Work Books\* Supplementary reading material for teachers and fearners,

The Teaching Learning Material for classes 2 and 3 are being trialled on a selective basis during 96-97. On this basis improved materials will be introduced in all schools in 97-98 for class II and III.

The process of introducing the improved and modified versions, based on careful field trials and academic assessment for successive grades. will continue : class 4 materials will be trialled in 97-98; upscaled in 98-99; and class 5 materials will be trialled in 98-99 and introduced in 99-2000.

#### 4.2.2 Teacher Training :

Teacher Training plays a very important role in quality improvement of Education. In DFEP the main objectives of Teacher Training are : \*

- 1. Training of all the primary school teachers.
- 2. Improvement in the quality of in-service training programmes.
- 3. Bringing the teacher out of his/her academic isolation.
- Develop teachers as key resource persons in the educational system. 4.

The District Institute of Education and Training (DIET) will be overall responsible for all the training programmes of primary school teachers. The main feacture of training is that it is participative and decentralised in the sense that talented teachers are involved in the State, District and Blocks resource group which designs the training module and further train the teachers. The feed back received after the training is analysed and used to modify the training module.

The strategy for the training of teachers will be as follows :

#### (a). Constitution of District Resource Group (DRG)

A District Resource Group (DRG) consisting of the faculty members of DIET, primary school teachers of repute and Educationist who have been actively involved in primary education will be c:\plan97\bhind\bhind.doc (7)

constituted. Care will be taken that at least one teacher from each block is included in DRG. Two or three members of DRG will be trained by the SCERT in a 12 days training programme on the new teaching learning package developed by the SCERT. These two or three DRG members will in turn train the remaining members of DRG.

#### (b) Identification of Master Trainers (MT)

A group of Master Trainers (MT) will be identified by the DIET in consultation with BEO for each block. The group will consists of 10 to 15 teachers, and active educationist who will be responsible for the training of teachers.

The Master Trainers will be trained by DRG on the same pattern as was adopted for the training of DRG by SCERT. The training will be held at DIET Bhind. The Master Trainers in turn will train the teachers at the Block.

#### (c) Teacher Training at Block level

The Teachers Training Package developed by SCERT will be used for the training at various level. The teacher's training module will be based on teaching learning materials to be transacted in the class rooms one day training on administrative issues will also be given. The training programme in successive years of the six year plan will be as follows :

Table	4.6	
-------	-----	--

Sno.	Years	Target	Content during 12 days training
1	1997-98	All the primary school teachers	Class I, II and III -7
2	1998-99	<sup>n</sup>	Class IV
3	1999-2000		Class V
\$	2000-2001		Referasher course class I-V
5.	+ 2001-2002		Referasher course class I-V

#### School Contingency :

All the 1216 schools will be provided a some of Rs. 3000 as school contingency. Amount to be used for improving educational facitilies and development teaching learning aids. Out of the Rs. 3000. The amount Rs.1000 will be used for development of teaching aids and will be given to two teachers of "the same schools, thus each teacher will get Rs. 500. Rest of the amount will be given to the  $\forall$ ECs for improving the educational infrastructural facilities.

#### 4.2.3 ACADEMIC INSTITUTIONAL SUPPORT :

For the effective implementation of teacher training, it is essential to have a strong academic r source support system. This would include strengthening of  $e_{23}support$  institution i.e. DIET & creating new support system i.e. BRC & CRC.

## DISTRICT INSTITUTE OF EDUCATION AND TRAINING (DIET) :

Under the centrally sponsored scheme of heacher Education, the BTI Bhind was raised to DIET in the year 1992. The DIET is runing in the old building and hostel facilities are not available. Work has started to construct a new new building for DIET

The DIET has been conducting both pre-service and inservice elementary teacher training programmes. Under DPEP an intensive training programme has been envisaged, and the DIET would serve as a principle professional support agencies in the district. DIET would organise in-service training for teacher trainers, AS supervisors, NFE instructors. In the context of DPEP, DIET will provide adequate support to the Block Resource Centres and Cluster Resource Centres. BRCS and CRCS would be the main centres for imparting training to the teachers, supervisors, VEC members.

In addition to the teacher training Programme the DIET will take up the following activities :

- Monitoring training programmes, getting feed back
- Evaluate the achievement of the children on sample basis.

c plan97/bhind/bhind.doc (7)

Conduct surveys and studies Conceptualizing and identifying innovations Carrying on action research Modifing the training modules.

Publication of bulletins, news letters supplementary reading materials

For fulfulling the above, DIET will be strengthened. The DIET will be provided additional furniture, equipment, books, vehicle, funds for paying fees and honoraruims to the professionals, conducting training programmes, educational materials, micro projects, innovations and studies.

#### **BLOCK RESOURCE CENTRE (BRC):**

Keeping in view the need for decentralization and increasing involvement of teachers in various education related processes, BRC'S will be established at each block head quarter. Each BRC will have its own building, equipment and staff that will be funded from DPEP. The BRC will function under the guidance of Block Education officer.

Functions of BRC

- Training primary school teachers, AS instructors, CRC heads and academic coordinators, -Resource persons for VEC members training.
- Organising monthly meetings for CRCH and CACS
- Mobilization of public support for awareness.
- Preparation, implementation and monitoring of Block plans
- Coordinate with different department and functionaries at Block Level
- Providing academic support to CRCS
- Assisting DIET in developing material, field testing and innovations.
- Coordinating school mapping and micro planning.
- Organising field interaction.

The BRC will be provided non recurring grant for purchase of furniture, equipments and educational materials (list annexed) and recurring grant for organising meetings, workshops and training programmes.

#### **CLUSTER RESOURCE CENTRF. (CRC) :**

A CRC for all primary schools falling within of a radius of 8 kms will be established. District Bhind will-have 140 such CRCs. The CRC will be located in a primary school having a spare room or in a middle school having a primary section. The head master of the school will be the Head of the CRC. One academic coordinators, who will be a motivated primary school teachers having worked as master trainers will be attached at CRC. The Academic coordinator will concentrate on academic supervision of all the schools of the cluster. The functions of CRC will be as follows

- To organize monthly meetings of the teachers to discuss and resolve the academic issues through mutual sharing of the achievements, developing teaching aids, discussion on some topic to be taught in subsequent months, prepare school cilendars.
- Resource centre for the Teachers, EGS teachers.
- Training centre for VEC members and provide resource support.
- To provide assistance for environment building for UPE.
- Providing feed back on academic problems and academic achievements.
   CRCS will be provided non-recurring and recurring grants to carry out cluster level activities.

#### 4.2.5 EGS teachers training :

For the teachers appointed in EGS, a 12 days training will be organised, following the pattern of formal school teacher training.

#### 4.2.4 Training of Alternative School Supervisors/Teachers :

In view of the fact that AS will be a new concept intended to address a heterogenous group of learner in an ungraded system, AS teachers and supervisors will be given intensive training based on textual material. The training will be residential and of 10 days duration and will be organised either at the DIET level or at the Block level as per district's convenience. Supervisors will be given additional

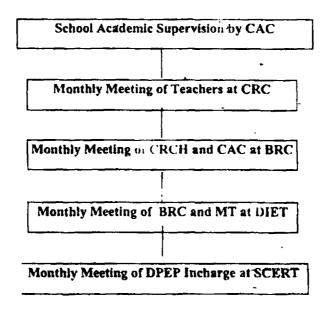

training of one week with the help of an NGO Digantar which has considerable experience. The supervisory role will be highlighted during the training.

#### ACADEMIC MONITORING AND FEEDBACK :

• During last three years, serious efforts are underway at the state level to improve the quality of education through Curricular reforms, Developing new teaching learning materials and intensive teachers training programmes.

An effective Monitoring and feedback system has been tried out by SCERT in the existing DPEP districts which stresses on academic supervision of the schools by Cluster Academic Coordinator (CAC), monthly meetings of teachers at the clusters, monthly meetings of the Academic Co-ordinators at the block, district, and state level and disseminating the messages of pedagogic reforms of SCERT, DIET down to the teachers.

All these efforts have set up a stage for qualitative improvements. These initiatives will now be adopted or adapted by this district.

# 4.3 EQUITY ISSUE

#### 4.3.1 Girls Education

One of the objectives of DPEP is reducing gender disparties in enrolment, retention and learner achievement, providing access and educational opportunities to all girls, to make the education system more supporting to the needs of girls and women and create an environment which enables women to demand education for themselves and their daughters.

The baseline studies on gender carried out in selected blocks of DPEP districts revealed that women are victims of moral and physical exploitation and are denied equal access to basic human needs of food, shelter, education and participation.

T-14 7

The literacy rate for male and female in rural and urban areas is given below.

#### Literacy Rate

ž ž	Male	Female	Total		Urban			Rural	1 aote 4.7
				M	F	Т	M	F	Ţ
M.P.	58.42%	28.85%	44.20	81.32	50.92	5	51.05	19.73	3~
-Bhind 🍝	52.79%	22.24%	39.06	61.76	36.42	50.29	50,48	18.53	36:15

The figures in the above table clearly indicate that special efforts need to be made towads female group especially in rural areas to bring it at par with male literacy of the district.

The base line study clearly indicates that female children are kept busy in

- 1. Caring for siblings
- 2. Fetching water
- 3. Collecting fuel and fodder
- 4. **Domestic** animals care
- 5. House hold work.
- 6. Carrying meals to the fields.

To address these issues special programmes are to be taken up with the help of other departments such as Mahila Bal Vikas for the education of such girls so that they may come forward

for éducation. Special community mobilization programmes aimed at girls education will be taken up. DWCRA groups, TLC members, panchayat members specially the female elected panch and Sarpanch, will work together. The "Kala Pathaks" folk artists of Department of Social-Welfare & NGO's will be trained and used for the mobilising activities.

Use of Audio Visual materials & cultural forms specially folk froms, print media for creating a positive environment for-girls education.

Massive girls enrolment drives will be launched.

Holding women panchayat conventions at various levels for leadership role.

Synergising with women's mobilisation in TLC, intensive efforts & organising Mahila Samoohs at village level.

For effective implementation of the above stated strategies, the gender coordinator will be trained. To assist the gender coordinator at the district & block level, gender core groups will be constituted consisting of academicians, activists, social workers, gender experts and teachers. These groups will advise, monitor & guide the planning & implementation of gender-specific interventions. Continuous monitoring of data on girls attending on dropping out/staying away from schools will be ensured for corrective interventions.

#### 4.3.2 PHYSICALLY HANDICAPPED CHILDREN :

Educations of physically handicapped children is a challenge for any education project.

A village wise survey of physically handicapped children through Lok Sampark Abhiyan has generated information on the size of the group of physically handicapped children.

~~			Table 4.
Block a	Boys	Girls	Total
bnind-	272	153	425
Ater	336	148	484
Raun 🗧	171	69	240
Lahar	281	130	411
Mehgaon	-370	151	527
Gohad -	270	<u>`106</u>	376
District.	1700 -	763	2463

As per LSA 1700 boys and 763 girls, are handicapped. The block wise distribution is as under:-

Since these children are spread through out the district, one of the strategies for their education will be that they get education in the schools of their locality. The basic strategy will be to integrate them in the schools; using the insights and experience of the pilot PIED project in M.P. The teachers of schools will be given special training for proper development of the children.

- Awareness and Orientation programmes will be held for the DPEP functionaries, community & teachers to be sensitive to the educational needs of handicapp children.
- Provisions under DPEP will be made for essential rehabititation and educational aids and appliances.
- Provision for removal of architectural barriers in existing schools to provide easy mobility to children with disability.

# 4.3.3 Special focus on SC children : literacy figures of SC & General Children (5-14 age group)

The above table clearly indicates the disparties between the general caste & SC's.

The SC dominant areas will be given preference in providing educational facilities.

Community mobilisation initiatives will be undertaken for greater social integration and parity.

Efforts will be made to disseminate wide information of prevalent incentives for SC families and to ensure the delivery of incentives.

#### 1.4 MANAGEMENT SYSTEMS :

For effective implementation of the strategies outlined it will be essential to develop an efficient management system. The existing management system will be strengthned by providing additional project management structures.

The Project Management Structures will be based on the following considerations:

- 1. A participative management system that facilitates the collaborative working of government and non-government personnel. For this a two-legged structure of governmental & nongovernmental agencies will be setup :
  - Peoples participatory structures are the District unit (DU), Block-Unit (BU) and Village Education Committee (VEC). These structures include some key governmental functionaries, Panchayat members and active community members.
  - Governmental agencies DPO/DIET, BRC, CRC.
- 2. Decentralisation up to the grass root level to ensure responsiveness and promptness of action.
- 3. Autonomy and flexibility to project structures for efficient functioning. The project structures<sup>-</sup> will be governed by distinct procedures guiding their administrative & financial working.
- 4. Integration with existing structures so that the project stuctures work conjointly with the existing systems.

# 4.4.1 Management structures:

		7.	Two non-official member from among the seven non-official members nominated to the District Unit.	
		8. 1	District Project Co-ordinator - Member Secretary	

#### 4.4.2 FINANCIAL SYSTEM

The state implementation society has developed its financial system within the frame work of the 'Financial' and Administrative Rules' of the Mission which is approved by the Executive Committee. These rules-give the Mission financial autonomy within the control of clear norms and procedures. The DPOs finenaial system is also defined by these rules.

Funds received from GOI and GOMP are released in SPO account of the Mission. Onword flow of funds is though a defined fund flow system, described below.

#### At the District level :-

The district budget will be released to the DPO in a joint account of DPC and DDE. The budget for DIET related activities will be released directly to the DIET from SPO with intimation to DPO.

#### B. At Block level :

The fund for the block level activities will be released by DPO to the block, in the joint account of BEO and BRCC. DIET will also funds release to the academic activities in this joint account.

For construction of BRC building the funds will be released from DPO to the Block Nirman Samiti.

#### C. At the Cluster level :

Cluster meeting expenditure will be provided by the DIET and will be maintained at the CRC in joint accounts of CRCC and Head masters.

#### D. At the Village level :

At the village level tund for civil work is released by the DPO to the Village Nirman Samiti (VNS). For VEC fund will be released to the joint account of Sarpanch and teacher who is the Member Secretary of VEC.

At all levels double entry book keeping is to be followed. The accounts will be audited in three stages.

- Internal audit
- External statutory audit by a chartered accountant
- Audit by the Accountant general of the government.

# 4.4.3 PROCUREMENT OF BASIC OPERATIONAL FACILITIES

- To achieve short term goals and provide infrastructural support for long term goals of DPEP, procurement is an essential activity.
- 2. Decentralised procurement provides a means of understanding the problems pertaining to requirement, procurement and distributions of procured goods. It will enable the local representatives to feel involvement in programme implementation and monitoring at all the activity levels.
- 3. GOI's directives and IDA norms for procurement are to be followed.
- 4. The total package procurement cost at the district level is below Rs. 15 lakhs thus local/national shopping pattern will be followed.

Procurement has been decentralised at District, Block, Village levels through procurement committees with official and non-Official representatives.

List of items to be procured at various levels is annexed.

### 4.4.4 MONITORING & SUPERVISION

Monitoring will be done to ensure the proper implementation of project strategies. To assess the impact of project strategies on the 3 basic goals universal enrolment, retention, achievement, effective implementation and monitoring of the progress made by project will be ensured. For this the basic strategy for monitoring will be operationalising the management information systems. This would include

Collection of information to create database. Generation of reports based on the database.

Reviewing the progress by analysis of the generated report at the block, district and state level programme review meetings.

Inclusion of correctives in subsequent annual plans.

LSA & EMIS will help generate two types of database

#### Lok Sampark Abhiyan (LSA) :

The first information source is LSA which is the village database which captures data on number of children in age group 5-14 years, no. of children enrolled, no. of children unenrolled, no. of dropout children, educational and non educational resources available in village, number of adult literate and non literates, no. of acceless habitations.

The mode of collection of the village database is participatory and the community has access to the information right at village in village education records (VER). The information is also to ---be displayed through the school maps.

#### EMIS :

This software will make possible to collect school data base such as -

- Basic education information
- Infrastructure details
- Teacher/Staff details
- Student enrolment (which is castewise, sexwise & agewise)
- Attendence, retention as development details
- Equipment details

EMIS will hus serve as support systems which would generate accurate and timely information for effective monitoring of school database. The data capture format and software called DISE (Dist. et Information on School Education) has aheady been developed by NIEPA.

#### IPMS :

The Integrated Project Monitoring Syster is already developed by the SPO that will make possible to get monthly and quaterly feed back on various programme components from grass root to state level. This will promote immediate follow up and correctives to be taken as and when necessary.

Integration of Lok Sampark Abhiyan data with IPMS will make cohort monitoring possible as progress against benchmark data will be measured constantly through updation.

The monitoring of the information at the grass root would include updation of the data of VER's. The VER will be reviewed once a quarters in the meeting of the VEEs, the base data on enrolment and attendance recorded in the VER w ' be updated through the information collected by the school teacher in the school and discussed in the VEC. This will then be recorded in the IPMS format and sent up to the project office. This will have the following advantages :

- 1. The data base will be constantly updated.
- . 2. Monitoring will be aganist bench marks.
- 3. Collective review and discussion at village level will lead to more transparent system of information; monitoring will not be passive- so many numbers reported up; It will become on interactive self assessment by the community of the problems and needs of it childrens education.
- 4. The MIS will become a participatory Village Information System (VIS ) fusing technical management with community records.

#### **PM13**:

PMIS will collect data on the implementation of the project in terms of committment of physical progress and expenditures. This will be generated as QPRs- Quartely Progress Report. The PMIS reports will be generated from the IPMS.

Thus a comprehensive MIS will be operationalised yielding a variety of reports on different project parameters.

# 4.4.5 CAPACITY BUILDING :

The building of capacity for planning and management is the mechanism through which DPEP is expected to achieve its objectives. For this a state level institution has been set up called State Institute of Education Management and Training (SIEMT). SIEMT will be assisted by national level institutions like the NIEPA & NCERT and will work towards organisational & staff development capabilities.

٢

The training programmer for the Management personnel is proposed as follows :

Sno.	Training	:Persons	Duration	Venue -

#### Special skill development & refresher training :

 After a period of Amonths of the foundation course District Project Director, District Project Coordinator, Assistant Project Coordinator (Finance), Assistant Project Coordinator (Equity), Principal DIET, Programmer, Acek-Education Officers, Block Resource Centre Coordinators will be given a short term course of 5 days on special skills. This will be conducted by SIEMT.

° c=`plan97\bhind\bhind.doc ( 🎵

.

- 2. After a period of 4 months the District and block level functionaries as given above will be given a Refresher course for 6 days.
- 3. CRC Heads and CRC Academic Coordinators will attend-1-2 days orientation on management along with training to be given by DIET:
- 4. District Project Office personnel will attend a 3 days workshop on review and planning half year at SPO.

#### The short course on special skills would include :

- Managing people at work
- Leadership skills
- Decision making and problem solving
- Interpersonal Relationships and coordination
- Effective communication
- Motivating people
- Financial management
- Management Information system
- Resource Management
- Organising Meetings-effectively
- Development of innovations
- Effective Inspection and Supervision
- Seeking cooperation from Public Bodies like Panchayats or Govt. Agencies like RES, etc.

#### Self-Study :

The personnel will go through the literature received from SPO/SIEMT/other agencies to develop these solves as effective personnel.

#### Participation in Seminers :-

The personnel working at District/Block/Cluster level will be sponsored to attend workshops, seminars/conferences at Block, District and State level to improve their professional competence.

#### **VEC TRAINING :**

As DPEP aims at implementation of its activities with involvement of the community, it is essential that the grassroot level management structure VEC is empowered to take up the responsibilities assigned to it special VEC training will be organised every year to orient the VEC menbers in monitoring of project activities, supervision of school management and academic issue, supervision of construction activities if taken up and utilisation of school contingency amount.

The VEC training will be at the Cluster level for a day. In addition hands on orientation of VECs will be through their involvement in.

#### 4.4.6 INNOVATIONS :

The Lok Sampark Abhiyan has brought to the light a large number of issues related to access retention, small habitations, enrollment, poor achievement of the children, absentism both of teachers and students, dropouts, early child education, education of disabled children, education of migratory children, multiclass and multigrade teaching, education of adult girls, gender biased curriculum, lack of awareness about the value of education and many more such issues. For this the data thrown up in the LSA will be studies and analysed carefully and suitable strategies will to be evolved to tackle specific contextual issues.

-Some of these will relate to improving the education of girls, particularly scheduled castes developing empowered community structures for school management for improving class room processes and cost circctive construction practises.

#### 4.4.7 RESEARCH, EVALUATION AND STUDIES :

A Research, evaluation and innovation\_committee will\_be created at the DPO which will discuss, debate and finalize some projects for class room research and innovations that may be taken up = in weak blocks. Experts from DIET, SCERT, RIE, NGOs along with highly motivated public representatives will be invited to guide and prepare long term and short term projects. for the district.

Studies will be taken up to identify the target areas & groups that would require special interventions. The impact of various DPEP intervention on the education status of children will also be studied.

#### 4.5 PROJECT OF JHOOLAGAR

Sibling care is an acute problem in rural areas which is the major reason for girls not attending school because of the working parents who go out to the fields or for any other wage carning job, the elder girls are left at home to who take care of domestic course and specially look after the younger ones. This problem needs special focus and attention if goals of UPE are to be achieved.

In Madhya Pradesh, DPEP has paid special attention to this problem and in the first two years linked with primary school, pre primary child care centres were started named as Shishu Shiksha Kendra. These centres were for children in the age group of 3-6 years and the studies that have been conducted on evaluation of these centres have clearly informed that the centres have helped in increasing enrolment of girls in schools. About 4036 centres are operational in 19 DPEP districts.

There was an understanding that these centres will be operationalised only in non-ICDS blocks. As ICDS has expanded to all the districts and blocks of Madhya Pradesh; DPEP has decided not to open any more centres from this year and to continue with the centres already started in previous years till they are finally handed over to department of Women and Child Welfare. The sibling care problem will be tacked through establishing functional linkages with Aanganwadis run by the Department of

Women and Child Development and by bringing about the convergence-in time and space of Aanganwadis and primary schools.

The problem of children below 3 years of age will remains untackled and requires some strategic interventions. Keeping this in view a scheme of Jhoolagar (Creche), is being introduced in one Block of each of the DPEP districts. About 50-60 Jholagars will be sanctioned in the first year. These child care centres will take care of children in the age group of 0 6 years and will have linkage with primary school in space and time. Special training module will be developed for the functionaries of Jhoolagar and the scheme will be based on the Jhoolagar ideology of Social Welfare Department. Jhoolagar will not impart any formal education to children but will take care of the children during school hours of the linked primary school and play way methodology will be used to keep the children engaged and to educate them informally. The scheme will stand as follows :-

one Jhoolagar will have :

- 30 children in the age group of 0-6 years.
- One DEEDI (elder sister) and one Aaya (Helper)
- No recurring grant of
- Recurring grant of
- Training of DEEDIS 10 days.
- Training of Helpers 5 days
- Training to be given at BRC-level.
- Training modules to be developed by ECE Cell of SCERT and to be coordinated by them.
- Space for Jhoolagar to be given by the community.

#### 4.6 CIVIL WORKS :

The most important aspect of universalisation of primary education programme is access. It is visualised that every school going child should have schooling facility within one kilomete periphery/radius. Under DPEP areas have been identified where schooling facility is not available within a radius of one kilometer and provisions for providing school building have been made under the budgetary provisions of DPEP.

# CONCEPT OF SCHOOL BUILDING

The school building to be constructed is taken as a concept and not simply as a physical structure. Besides making the building useful, convenient and comfortable for the children-attempts will be made to make it look attractive so that children have a sense of belonging for the school building. A positive relation between the school building and the curiosity and creativity of the child can be achieved by visualising and constructing the school building as an environment which stimulates and encourages the imagination and nascent potentialities of the child.

The design of the school building under DPEP for this district will have the following special features :

- a) The building has two class rooms, a verandah and a teacher's room.
- b) Drinking water facility and electrification.
- c) Rooms are ventilated and lights.
- d) Two Black-board is each room, one in the verandah and one on the outside wall at suitable heights.

e) School has toilets.

f) The windows are at a how height so that child can see the outside world easily. The design shall -- conform to the idea that the school is a place of learning rather than a place of teaching.

#### **NEW SCHOOL BUILDINGS** :

Block level Panchayats of the Districts have proposed to construct 289 buildings for the schools for the schools which are without any buildings. Under DPEP 167 School buildings will be constructed and the remaining shall be constructed through other Rural Development Plans.

#### **NEW ADDITIONAL ROOMS:**

During village level planning, concern was expressed by the community representatives at many places regarding the paucity of rooms, the number of additional rooms required is 910, out of which 180 rooms are proposed to be constructed under D.P.E.P.

#### BRC:

Besides school buildings, under DPEP a special structure called the Block Resource Centre at the block level is also being constructed. It shall function basically as a teacher training Centre at the Block level where teachers training courses will be organised.

Residential accommodation for male and female teachers during their training is provided for in the building. Besides this, BRC will have a lecture hall. an open space, a store-room and an office room along with toilets electricity, water supply and boundary wall.

#### SALIENT FEATURES OF THE STRATEGIES EVOLVED :

#### A. DESIGN STRATEGIES

Evolution of Norms for location, site planning, class room and other spaces. Evolution of Geological, Climatological, Cultural and social parameters for designs. Buildings Element Vocabulary based on Local Materials, Crafts and Techniques. Improvement and Improvisation in the Local Building Element Vocabulary to result in technically sound proposal.

A holistic visualisation of all spaces in the campus.

Development of a design concept and prototype.

Essential inclusion of a defining enclosure, toilets, water supply, electricity and landscaping in the design.

All provisions in the design to be made within the cost ceilings.

# **B.** STRATEGY OF CONSTRUCTION :

Participatory approach in the decision regarding location of building and the process of construction will be adapted. By encouraging the participation of people or popularly elected representative, it is envisaged that the building programme shall emerge as a concrete manifestation of peoples' movement and shall also reflect certain inclinations towards desirable social change.

The actual construction work shall be carried out by the construction agencies of Panchayats viz Block Nirman Samiti (BNS)<sup>-</sup> and Village Nirman Samiti (VNS). Observing, simplicity of procedures and transparency of operations in all the aspects.

# **TECHNICAL SUPERVISION & EVALUATION :**

The construction will be technically supervised and evaluated by a group of technical persons spoin ed by the collector.

# TARGETS AND UNIT COSTS :

S.NUT	Particulars Target	Unit Cost (based on 95-96 prices)
1.	New School Building	2,25,000/-
2.	Addl. Room	75,000/-
3.	Drinking Water in School Bu	ilding 30,000/-
	BRG Building	5,40,000/~
5.	(W.S. Arrangement in B.R.C.	50,000/-

(Source of information - LSA)

# Causes : ....

- 1. Being busy in their field work.
- 2. Being busy in doing labour (in farm)
- 3. Being busy in labour (in factories)
- 4. Looking after brother and sisters on being busy in household work.
- 5. Taking domestic cattles for grazing.
- 6. Taking other's cattles for grazing -
- 7. Families weak financial condition.
- 8. Lack of educational facilities on being too for.
- 9. Social pressure due to which parents do not send their girls to school.
- 10. Children being handicapped/due to long term disease.
- 11. Others and under age of 6 years.

# Annexure - 6

## INDICATORS TO MEASURE UPE -

As stated above we aim\_ -

All-the children of the age group of 6-11 years in the first instance attend school within redius" of one km.

They stay at the school for the five years and complete primary schooling.

They achieve essential level of learning

The indicators to achieve the above are as follows-

A. Gross accessratio (GAR) GAR is defined as follows

No. of habitatioins having primary school or  $N^+E$  centre within one km. radius.

Total no. of habitations.

B. Gross enrolment ratio (GER) - It is expressed as follow -

No. of Children eurolled in class 1-V

C. Retention ratio - For any particular year say (96-97) is defined as No. of Children environment in class V in the year of 96-97 (-) No. of repeaters in class V in that year

RR =-----X100

No. of children envolved in class I four years earlier (92-93)

Gross achievement ratio (GAMR) - It is defined as

No of Children scoring 80% or above in a minimum levels of test for class V

Total No. of children completing five years of schooling or its equivalent through NEE

### A summary on Eduction Guarantee Scheme\*

# Objective :-

The EGS would be operative in rural areas where the community raises a demand for schooling facilities for its children and the number of children are atleast 40 and there is no schooling facility within 1 km of that habitation. In the tribal or sparsely inhabited areas the number of children could be between 25-30. The government would, on receiving the demand guarantee to provide an educational package within 90 days of receiving the demand.

The EGS is thus postulated on community demand for education, and the government's accountability to respond to such a demand. A *demanding* community is the strongest premise for an EGS.

EGS would be implemented by the Panchayat system because it combines statutory authority with popular participations

### 2. Operational Modalities of EGS:

The gram panchayat would be authorised to receive the demand for a primary education facility from the community. The Community in its demand will indicate the number and names of children for whom the facility is demanded and also propose the name of the teacher alongivith his/her qualification. The gram panchayat would submit the demand with its recommendation to the Janpad Panchayat. On receipt of a demand for an EGS centre from a gram panchayat, the Janpad Panchayat will register the demand and give an acknowledgment indicating the date of receipt and the date within which the EGS centre will be operational which will have to be within 3 months of the receipt of demand. The gram panchayat will give a copy of this receipt to the community. In this time period, the Janpad Panchyat would examine the proposal and if found feasible would allot required resources to the Gram panchayat toward the annual salary of the shikshakarmi and contingency expenditures. The formal appointment order of the teacher would be issued by the Gram Panchyat. The teaching-learning material would be supplied by the Education Department which will also arrange for the training of teachers. Other contingency materials will be purchased by the gram panchayat. The gram panchayat will be responsible for keeping the Janpad Panchayat informed of the progress of the EGS centre, particularly its academic aspects. The Janpad Panchayat will intervene and assist in solving problems at any level.

The state government will be responsible for allotting resources to the Districts.

An EGS Committee at the district level will be responsible for ensuring effective and timely implementation of the scheme.

# 3. Educational facilities provided under E.G.S.

The EGS will guarantee the provision of a critical minimum of inputs that are necessary for ensuring fegular participation of children in a teaching-learning process that enables the attainment of stipulated levels of learning. This will include :

# a) Teacher

The EGS would provide a teacher in a 1:40 Teacher pupil ratio. The EGS teacher would therefore be a local person. As far as possible preference would be given to women. If more than one teacher is required, then at least one would be a woman. The minimum qualifications for the teacher would be having cleared the higher secondary examination. In case persons of such qualifications are not locally available the qualification can be lowered to class Tenth.

The teacker will be designated as a Shiksha Karmi. The remuneration of the teacher would be on par with the Shiksha Karmi under the state government policy.

# b) Teaching Learning Material

The Teaching Learning Materials would be based on Minimum Levels of Learning (Min L) to ensure that children attain basic competencies designated for primary stages of education. The new teaching learning material being developed by SCERT will be used in EGS centres.

# c) Training of Teacher

Training would be for atleast 10 days on an annually recurring basis. Training would be both inductional and in-service training will be content based to quip the teacher to transact the teaching learning material.

# d) Evaluation and Supervision Learning evaluation will be ensured

Concurrent evaluation would be by the teacher. Beside this there would be a system of periodic evaluation through resource persons who would be drawn from the existing pool of teacher trainers. There would be atleast 1 such evaluation in 1 academic year. The purpose of this evaluation would be to assist the teacher the learner and the parents to be aware of both achievements and deficiencies so that remedial action may be taken for weaknesses perceived.

. .

# e) Operational Contingency

For contingent operational expenditures, an adequate sum would be provided to the teacher.

The EGS centre would have flexibility of timing and academic calendar subject to the minimum no of academic days prescibed by the State Government.

Thus the EGS package recognises that the issues of access and quality are not sequential. The EGS redefines opening schools, as priority attention on the key components of the academic transaction than on just a set of predetermined physical aspects of a 'school' & ensures that this educational facility is available to the most deprived settions of population

The use of composite pedagogy of improved Teaching Learning Material (TLM), recurring training based on these Teaching Learning Material (TLM), and continuous learner evaluation will be the basic strategy to ensure continued participation and achievement of basic learning levels by children.

EGS is based on community demand. The EGS package is provided when the community demands this facility. This demand will: indicate-the community's willingness to provide space for learning and support other operational incidentals when need arises. EGS restores to the people their control over local education.

The unit cost of an EGS package works out to about 135 of per, annum.
